

Gulfsands[✦]

**ANNUAL REPORT
AND ACCOUNTS 2022**

Gulfsands Petroleum plc is an independent public energy company, incorporated in the United Kingdom.

The Group's focus is growth in the Middle East and the broader MENA region and its core asset is its interest in Block 26, a world class resource in North-East Syria, which is currently under Force Majeure as a result of UK Sanctions.

Strategic Report Highlights

Gulfsands Petroleum plc is an independent, public energy company, incorporated in the United Kingdom, focused on growth in the Middle East and North Africa region.

The Group's Core Asset Remains the Block 26 Assets in North-East Syria

Currently in Force Majeure due to UK Sanctions.

Involvement in Syrian operations remains suspended during continuation of UK Sanctions, with which Gulfsands remains committed to full compliance.

According to in-country sources, assets appear to be in good order, materially undamaged and operationally fit.

Unauthorised production in Block 26, without the participation of Gulfsands, continues with average production of approximately 16,500 boepd throughout 2022.

No revenues have been recognised by Gulfsands.

Reported production levels appear to demonstrate the reservoir quality and that the field continues to be operable.

Oil Theft Continues

The Board now has conclusive evidence that the unauthorised production is undertaken by the Syrian Democratic Council/Syrian Democratic Forces ("SDC/SDF") and its affiliates.

The production is unauthorised, unlawful and breaches the Company's contractual rights.

The Board is determined to protect itself by asserting and defending its rights against this and indeed any unlawful activity in respect of Block 26.

"Project Hope" is an Initiative to Expedite the Return to Operations in Syria for the Benefit of all Syrians

Gulfsands is pioneering "Project Hope", a Humanitarian and Economic Stimulus initiative whereby international energy companies would return to operations in North-East Syria, with allocated revenues from oil sales deposited in an internationally administered fund and disbursed to finance early recovery, humanitarian, economic and security projects across the country – for the benefit of all Syrian people.

The Quality of the Block 26 Assets Remains and is Confirmed by Independent Review, updated in 2022

Confirmed by Competent Persons Report ("CPR") undertaken by Independent Consulting Firm Oilfield Production Consultants ("OPC"), originally in 2019 and updated annually to ensure no material changes.

+20 years resource life and the potential to produce over 50,000 boepd from existing discoveries.

Prospective portfolio takes the potential production of the field above 100,000 boepd.

2C Contingent Resources in Yousefieh, Khurbet East and Al Khairat fields (2P Reserves if it were not for force majeure) as at 31 December 2022 of 73.5 million boe (net to Gulfsands). This is a decrease in 2C resources compared to 76.4 million boe in the 2021 Annual Report, as a result of unauthorised production during 2022.

Combined unrisks, mid-case Prospective Resources of 545 million boe & risks, Prospective Resources of 134 million boe (both net to Gulfsands).

Economic Evaluations undertaken as part of the OPC reviews indicate a central range of EMV of Block 26 (Prospective and Contingent Resources), of \$1 billion to \$1.5 billion, prior to taking into account above-ground risks.

Re-entry Planning Continues at Pace

Full Field Development Plan of the Yousefieh, Khurbet East and Al Khairat fields, prepared, reviewed and validated by OPC which is ready to implement, when circumstances allow, and can increase production to over 50,000 boepd.

CPR confirmed nine drill-ready prospects which could be targeted during an intensive drilling programme when circumstances allow, which could increase production to over 100,000 boepd.

Regional technical, finance and administrative team remains in place to implement re-entry plan as soon as viable.

Strategic Advisory Board established to assist Board and Management with complex political, legal and strategic aspects of re-entry.

Cleaned-up Business Platform for Regional Business Development

All legacy liabilities now eliminated following the recent exit from Colombia.

Capital structure clarified by formalising the conversion terms of the 2017 Facility.

Provides ideal platform to launch business development initiatives focusing on the MENA region.

These initiative's are supported by the experienced technical, finance and administrative team assembled in the region.

Establishment of Middle East Business Hub in Abu Dhabi

New MENA hub established in the world-renowned Abu Dhabi Global Market ("ADGM") in the UAE, along with a new MENA-dedicated subsidiary, Gulfsands Middle East Limited ("GMEL").

GMEL's focus will be on increasing Gulfsands' presence in the region, to both contribute meaningfully to the regional political discussion surrounding Syria, and to step up business development activities in the region.

Capital Efficiency and Continued Financial Support from Major Shareholders

The Company continues to be funded by the Major Shareholders under the 2017 Secured Term Financing Facility ("2017 Facility").

The 2017 Facility provides funding to the end of 2023 when it matures and, assuming no default or extension, will be converted to equity at a price of 5 pence per share.

The business continues to be successfully managed within budgets and financial targets set by the Board.

At the date of this Report, the Group had unaudited cash available for operations of \$1.2 million (of which \$0.64 million is awaiting electronic transfer settlement) and remains reliant on the Major Shareholders for additional funding, with £750,000 - £1 million remaining available under the 2017 Facility to cover G&A for the rest of 2023.

The Board continues to discuss funding needs, and sources of funding, for 2024 and beyond with the Major Shareholders.

Share Trading Post Delisting

The Company's shares continue to trade through the secondary trading auction facility provided by Asset Match (www.assetmatch.com).

Strategic Report Chairman's Statement

Dear Shareholder,

I would like to begin my statement this year by sending our profound condolences and sympathies on behalf of all of us at Gulfsands to those affected by the devastating earthquakes that impacted Turkey and Syria in early February 2023. Gulfsands continues to do what it can to support the relief effort and encourages any shareholders to donate through the official charities including the Disasters Emergency Committee and the International Federation of Red Cross and Red Crescent Societies. Links are available on our website.

As reported in last year's Annual Report, during 2022, the Company received confirmation of the termination of its last remaining non-core asset, the LLA-50 licence in Colombia, on environmental grounds. The administrative process of that termination has now been completed, which resulted in the elimination of all potential related liabilities (\$15.2 million) and the return to the Company of \$1.52 million of restricted cash.

This legacy clean-up has now enabled Gulfsands to refocus its strategy for the years ahead on building Gulfsands into a strong, independent energy company focused on the Middle East and North Africa region. This strategy has two core strands:

1. To protect and preserve our rights in relation to our World Class Block 26 assets in North-East Syria (currently under force majeure), and to prepare for, and work with the international community to expedite, a return to operations which will benefit all Syrians; and
2. Broader business development in the Middle East and North Africa ("MENA") region.

In late 2022, we established our new MENA hub in the world-renowned Abu Dhabi Global Market ("ADGM") in the UAE, along with a new MENA-dedicated subsidiary, Gulfsands Middle East Limited ("GMEL"). GMEL's focus will be on increasing Gulfsands' presence in the region, to both enable us to contribute meaningfully to the regional political discussion surrounding Syria, and also to use our local presence in Abu Dhabi to step up business development activities in the region.

In respect of Syria, Gulfsands hopes that its physical presence in the region will help it to structure and target its Syrian initiatives appropriately, taking into account the views of local stakeholders and, in doing so, galvanise regional support for such initiatives. Gulfsands remains committed to supporting work by the international community to deliver a long-term solution to the situation in Syria. Gulfsands is eager to work with all stakeholders, including those regional neighbours closely affected by the ongoing conflict, to try to find a way whereby Syria's energy resources can be used as a catalyst to bring relief to all Syrian people, after more than 12 years of devastating conflict.

Gulfsands continues to pioneer a Humanitarian and Economic Stimulus initiative whereby international energy companies would return to operations in North-East Syria, with allocated revenues from oil sales deposited in an internationally administered fund and disbursed to finance early recovery, humanitarian, economic and security projects across the country – for the benefit of all Syrian people who can, and should, benefit from their country's national resource endowment and build self-sustainability and resilience for the future. We call this initiative "**Project Hope**".

We can only deliver the meaningful change that we aspire to, with the help of our dedicated Gulfsands team, and our advisers including the Strategic Advisory Board who have continued to add tremendous value during the year. I thank them all for their ongoing support.

I wish you well for the year ahead and thank you for your faith in Gulfsands.

Michael Kroupeev
Non-Executive Chairman
25 May 2023

Strategic Report

Managing Director's Statement

Gulfsands' dual strategy to Protect and Preserve its rights with respect of its Syrian assets, and to advance regional business development is at the centre of its initiative to establish a new regional business hub in Abu Dhabi. Gulfsands is also pioneering a Humanitarian and Economic Stimulus initiative, "PROJECT HOPE", to help expedite a return to operations and to facilitate the ability for all Syrians to benefit from the country's important national resource endowment.

Dear Shareholder

2022 was a year of great progress for Gulfsands as we began building on a clean, solid platform to press ahead with our ambitions in Syria and in the broader MENA region.

As 2023 began we were however, all shocked by the catastrophic earthquakes that impacted Turkey and Syria in early February. We all at Gulfsands send our condolences and sympathies to those affected. Gulfsands continues to do what it can to support the relief effort through the official charities including the Disasters Emergency Committee and the International Federation of Red Cross and Red Crescent Societies. Links are available on our website.

Such events cause us to redouble our efforts to find a way that can enable Syria's natural resources to make a meaningful contribution to the relief effort and the country's early recovery.

The termination of our Llanos-50 licence in Colombia, following the prior farm-out of the Putumayo-14 licence to Amerisur Resources Plc in 2018, means that we have now completed our exit from Colombia and all related remaining legacy liabilities have been eliminated (see Note 2.4 for more details). In respect of LLA-50, we also recovered \$1.52 million of restricted cash during the year. We are proud of how we and Agencia Nacional De Hidrocarburos ("ANH") managed the mutual termination process which was agreed without liability to either the Company or ANH under regulations which allow for such termination in situations where it is not possible to perform activities due to environmental limitations.

Environmental concerns specific to the LLA-50 area were first raised in 2017 and 2018 as a result of preliminary environmental studies; the Environment Impact Assessment ("EIA") and the Medidas de Manejo Ambiental ("MMA"). The Company worked diligently with the ANH and environmental authorities since then, to assess the various possibilities for development, with the protection of the Llanos natural environment as a priority. After pronouncements obtained from the local Environmental Agency ("Corporinoquia") confirming the non-viability of the exploration program due to the severe environmental restrictions present within the Block, the parties agreed to the mutual termination agreement of the Contract.

The process that we went through, which is specifically addressed under Colombian regulations, shows that the oil and gas industry can make the right and responsible decisions in respect of environmentally sensitive areas, and we are pleased to have been part of this ground-breaking process in Colombia.

Core Strategy

With the legacy issues all cleaned up and clarity over the conversion terms of our 2017 Secured Financing Facility, with the ongoing support of our Major Shareholders, we are now able to focus on our core strategy of building Gulfsands into a strong, independent energy company focused on growth in the Middle East and North Africa region. This strategy has two core strands:

1. To protect and preserve our rights in relation to our world class Block 26 assets in North-East Syria (currently under force majeure), and to prepare for, and work with the international community to expedite, a return to operations which will benefit all Syrians; and
2. Broader business development in the Middle East and North Africa ("MENA") region.

To help implement this strategy, we have continued to expand our Strategic Advisory Board which is made up of individuals with deep experience in the fields of diplomacy, international politics, and post conflict rehabilitation. We also established our new MENA hub in the world-renowned Abu Dhabi Global Market ("ADGM") in Abu Dhabi, along with a new MENA-dedicated subsidiary, Gulfsands Middle East Limited ("GMEL"). GMEL's focus will be on increasing Gulfsands' presence in the region, to both enable us to contribute meaningfully to the regional political discussion surrounding Syria, and also to help us step up our business development activities in the region.

Syria

At the core of Gulfsands' strategy remains Block 26 in North-East Syria. Gulfsands remains the operator of this world class asset, holding a 50% working interest in the Block 26 Production Sharing Contract ("PSC"), alongside our joint venture partner Sinochem Group. Block 26 is located in North-East Syria and, due to UK Sanctions, Gulfsands is unable to be actively involved in operations having declared force majeure in respect of the PSC in 2011. In recent years our team has also been unable to officially visit Block 26 and so has had to rely on in-country sources and some third-party reporting to assess the current situation with respect of the assets.

It should be noted that following the Company's service of its Notice of Force Majeure and various legal steps taken by the state oil company, General Petroleum Corporation ("GPC") in Syria, GPC has assumed operational control and responsibility for the management of Dijla Petroleum Company ("DPC"),

the legal entity established to undertake the management and control of petroleum production operations and related infrastructure on Block 26.

As previously reported, the Group was informed by GPC/DPC that the oil fields in Block 26 were returned to regular production in January 2017. In-country sources, as well as several publicly available international news sources, confirm that this ongoing production continues and have identified that this production is undertaken by the Syrian Democratic Council/Syrian Democratic Forces ("SDC/SDF") and its affiliates. The average daily production since 2017 has been just below 20 thousand barrels of oil equivalent per day ("boepd").

This production is unauthorised, unlawful and breaches the Company's contractual rights. It is described by GPC/DPC as "stolen". Reports indicate that the average production during the year was around 16,500 boepd giving total unauthorised production during 2022 of around 6.0 million barrels of oil equivalent (2021: 7.0 million boe).

The Company has been unable to independently audit these production numbers and has been unable to visit the fields for several years due to an inability to get security clearance. Gulfsands has not recognised or received any revenue for any production under the PSC since the advent of Force Majeure. This production does suggest however, that the assets appear to be in good order, materially undamaged and operationally fit.

We continue to monitor the ongoing oil theft on our website and are disappointed to report that the total value of stolen production since 2017 (at an average oil price of \$70 per barrel) has recently exceeded \$3 billion (see screenshot from our website below).

Gulfsands remains committed to full compliance with applicable Sanctions and is therefore not involved in any production or exploration activities on Block 26 as Force Majeure was declared in respect of this PSC upon the introduction of UK Sanctions (then EU Sanctions) in respect of Syria in 2011. It also remains committed to follow, and comply with, international consensus in respect of Syria including UNSCR 2254.

Each year that passes represents another year of the devastating Civil War in Syria, and while the active warfare may be subsiding, the suffering of the Syrian people goes on. March 2023 represented the twelfth anniversary of the crisis. Political resolution is not something that Gulfsands can directly influence or predict, however we support the UN's initiatives to broker peace and hope that the various stakeholders can find a pathway to political resolution under the established framework of UNSCR 2254. Gulfsands continues to step up its engagement with key stakeholders, including regional and international governments, and stands ready to play its part, to the extent sanctions allow, in any agreed UN-sponsored initiatives that can help resolve the current crisis.

We do, however, believe that the country's national resource endowment should be used for the benefit of all Syrians and we continue to pioneer a Humanitarian and Economic Stimulus initiative whereby international energy companies would return to operations in North-East Syria, with allocated revenues from oil sales deposited in an internationally administered fund and disbursed to finance early recovery, humanitarian, economic and security projects across the country. We call this initiative "Project Hope".

Unauthorised Production from Block 26

Gulfsands' assets in Syria (Block 26) remain under force majeure. However, the fields continue to be unlawfully produced at a rate of around 20,000 BOE per day. Since the beginning of 2017, when this increased unlawful production was first reported, the amount of "lost" hydrocarbons and their potential value are as follows:

BARRELS LOST

Barrels of oil equivalent (BOE) misappropriated from the Syrian People since January 2017

42,857,142

POTENTIAL VALUE LOST

Potential value of hydrocarbons misappropriated from the Syrian People since January 2017

US\$ 3,000,000,000 *

* using an oil price of \$70 per BOE

Strategic Report

Managing Director's Statement (continued)

Gulfsands maintains a key focus on ensuring it is ready to recommence operations when circumstances, including sanctions, allow, while remaining sanction compliant in the meantime. We work with independent consulting firm Oilfield Production Consultants ("OPC") to update the Competent Person's Report ("CPR") initially prepared by them in 2019, based on up-to-date available production information. OPC have also reviewed the Company's Field Development Plan ("FDP") and have confirmed the Board's belief that Block 26 could contain over a billion barrels of recoverable resource with the potential for production levels of around 50,000 boepd from existing discoveries and over 100,000 boepd from a full block development incorporating potential exploration upside.

OPC also undertook an economic evaluation of the Block 26 project, which they have rolled forward at each subsequent year-end. While this evaluation did not, of course, take into account any of the above-ground risks associated with the assets, it did consider a range of possible valuation scenarios which indicated a central range of Expected Monetary Value ("EMV") of the Block 26 assets, including both Contingent and Prospective Resources, of \$1 billion - \$1.5 billion (net to Gulfsands).

Our technical team has continued with its internal analysis, incorporating previously un-analysed re-processed seismic collated prior to the declaration of Force Majeure. We are very encouraged with these internal results in terms of resources and the technical quality of the project, and at the right time, we intend to submit these to our reserves and resources auditor for further independent review and audit.

Details of the current Reserves and Resources are included in the Operations Review on pages 22-23.

Business Development

More broadly, the Company, with the backing of its Major Shareholders, remains focused on business development and building out the Company's portfolio both organically and inorganically in the Middle East and broader MENA region. The establishment of our MENA Hub in Abu Dhabi is a sign of our commitment to this part of the strategy. We continue

to explore potential business development and acquisition opportunities, and should any material developments occur in these areas, the Company will announce as and when any transactions are finalised.

Financing

Costs for the Group remain at a sustainable level, as agreed with the Major Shareholders, whose support we continue to enjoy. With no revenue from our current portfolio, we continue to rely on the support of our Major Shareholders for our current and future financing. In December 2021, the Major Shareholders (Blake and Waterford) expanded and extended the existing 2017 Secured Term Financing Facility ("2017 Facility"). The remaining funding available under the 2017 Facility is expected to be sufficient to fund the Group through the Facility's scheduled maturity in December 2023. The 2017 Facility is convertible at a fixed price of 5 pence per share at the option of either the Lenders (at any time), or, assuming no default exists, the Company (at maturity). This fixed conversion price gives comforting visibility of the capital structure of the Group going forward. The Board continues to discuss funding needs, and sources of funding for 2024 and beyond, with the Major Shareholders – see the Going Concern note for more details.

A drawdown request for £750,000 was made in April 2023. One remaining drawdown of between £750,000 - £1 million, depending on business requirements, remains available during the second half of 2023. Further, business development activity funding of up to £2.5 million may be available, subject to Major Shareholder consent and will be assessed, as required, based on opportunities identified.

More details on the 2017 Facility can be found on Note 3.6, and further discussion on Going Concern is included in Note 1.3a of this Annual Report.

Financial Results for the Year

The Group posted an Operating loss for the year of \$1.2 million (2021: \$2.9 million), and an overall loss for the year of \$1.5 million (2021: \$4.2 million). The main reason for the

reduction in the Operating loss was the recovery of \$1.52 million of Restricted Cash relating to the Llanos-50 licence in Colombia. General and Administrative ("G&A") costs for the year (after partner recoveries) were \$2.7 million (2021: \$2.9 million).

In terms of finance costs, both years included \$1.4 million relating to non-cash finance interest costs (2022: £1,196k [2021: £1,028k]). 2022 also saw a credit of \$1.2 million of foreign exchange gains on the 2017 Facility, compared to a credit of \$0.2 million in 2021. These amounts impacted the overall loss for the year but not the Operating loss. See the Financial Review on pages 26 - 29 for more details.

In the absence of revenue, the Group remains reliant on its Major Shareholders for funding and continues to focus on controlling costs to an appropriate level given the activities of the Group. After several years of reducing the cost base (after partner recoveries) to a range of \$2-\$2.5 million per annum, increased activity in respect of Syria readiness, the establishment of GMEL and increased business development activity means that we estimate that G&A (after partner recoveries) will increase to around \$2.5-\$3 million going forward.

At 31 December 2022 the Group had total unrestricted cash and cash equivalents of \$1.1 million, and at the date of this Report, the Group had unaudited free cash available for operations of \$1.2 million, following the £0.75 million drawdown under the 2017 Facility in April 2023 (of which \$0.64 million is awaiting electronic transfer settlement).

As at 31 December 2022, the Group had \$14.9 million (£12.3 million) (2021: \$15.0 million [£11.1 million]) of debt outstanding including accrued interest and fees under the 2017 Facility. Under applicable accounting standards (IFRS 9) this debt is represented in the balance sheet as \$13.3 million debt liability and \$3.3 million equity, totalling \$16.6 million, to reflect the split between the discounted value of the debt and the resulting equity value as at the time of the extension in December 2021, and at each drawdown date. Although there is no interest payable under the new terms of the 2017 Facility, a non-cash effective interest rate of 12% is accrued on the discounted debt liability over the life of the facility, to reflect the Directors' view of the arm's length cost of funding of the business.

Since the Company's delisting from AIM in April 2018, the Company continues to be a Public Limited Company (a "PLC") and the Group has maintained strong Corporate Governance standards during the year including having a Board of Directors that is independent of both the Major Shareholders and Executive Management. Gulfsands' shares continue to trade through the secondary trading auction facility provided by Asset Match. Anyone wishing to trade Gulfsands' shares should contact Asset Match directly at www.assetmatch.com.

Environmental, Social and Governance

As we look forward, Gulfsands continues to commit itself to being a responsible and reliable partner with all its stakeholders. As a sign of this commitment, we introduced in 2022 a new Sustainability Committee, led by myself, to ensure that Sustainability considerations are taken into account in everything we do, including our re-entry planning in Syria and any new business development initiatives that we undertake. You can read more about this in our Strategic Report where we describe our new Environmental, Social and Governance (ESG) strategy which has adopted the UN's Sustainable Development Goals ("SDG's") building blocks as core to its framework.

As part of this initiative, we have undertaken a number of community-based programmes including an initiative with the Chaffinch Trust and Phoenix Space regarding STEM based learning, particularly for girls in regional refugee camps. We intend to expand this, and similar initiatives, in the year ahead.

Outlook for 2023 and beyond

Gulfsands' strategic focus remains clear – to become a strong, independent energy company focussed on growth in the Middle East and broader MENA region. At the core of this strategy remains our world class Block 26 which we will seek to preserve and protect against all challenges, and plan to develop further when we get the opportunity. We also seek to develop that asset further when we get the opportunity.

2023 will also see a step up in our business development activity in the MENA region, spearheaded by our newly established Abu Dhabi hub.

While we continue to do all we can to preserve and protect our rights and assets in Syria we will prepare our readiness for returning to operations as soon as circumstances allow. While the macro situation is, of course, beyond our control, we continue to promote "Project Hope" and lobby the international community to find a solution to the situation in Syria for the benefit of all Syrian people. Gulfsands stands ready to play its part, to the extent sanctions allow, in any agreed UN-sponsored initiatives that can help resolve the current crisis.

I would like to close by thanking our shareholders for their continued support and express my gratitude to the entire Gulfsands team, who continue to deliver on our strategic objectives with incredible dedication.

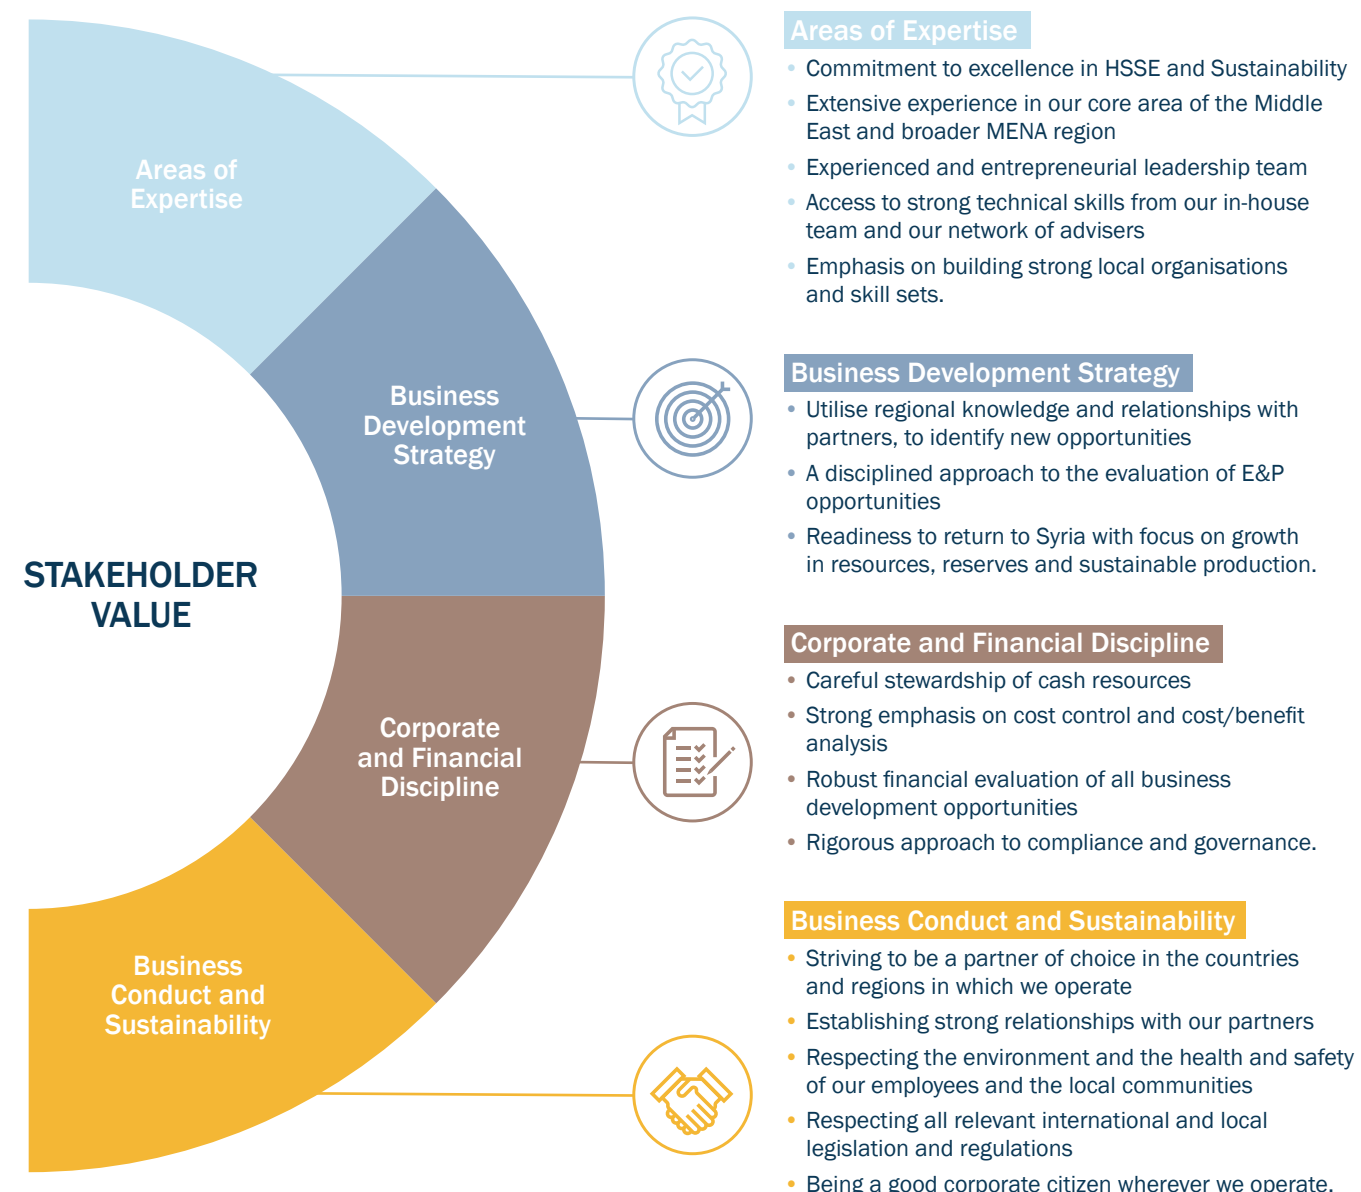

Yours sincerely,

John Bell
Managing Director
25 May 2023

Strategic Report Our Business Model

In recent years the Group has focused on aggressively managing costs and streamlining its staffing and organisational model to match its reduced involvement in operations. The Group now has the platform to focus on its core strategy of building a strong, independent energy company focused on growth in the Middle East and broader MENA region. At the centre of this are the core Block 26 assets where the Company is ready to return to operations, as soon as sanctions permit. We also continue to explore potential business development in our core area of expertise, the Middle East and broader MENA region.

Our business model remains based on the following building blocks:

Strategic Report Sustainability – Licence to Operate

It is imperative that Gulfsands maintains its “Licence to Operate” and therefore, throughout everything we do, we seek to maintain strong relationships with all the stakeholders with whom we interact. This is the only way to build a truly sustainable business model. Balancing the requirement of all constituents is critical to our success and central to our decision making.

Gulfsands seeks to maintain its “licence to operate” by being a responsible and reliable partner with all stakeholders.

Gulfsands is focused on building a sustainable business model that considers the social, environmental and governance impacts of all its projects. Although Gulfsands does not currently operate any active projects, its focus on Environmental, Social and Governance (“ESG”) permeates all business development activities, as well as its Re-Entry Planning Strategy for Block 26 in Syria. Gulfsands has a proven track record of implementing extensive sustainability initiatives when it was able to operate within Syria. We are guided throughout by the principles outlined by the UN Global Compact and the UN’s Sustainable Development Goals (“SDG’s”).

Underpinning our development work is compliance with specific applicable legislation and guidance including but not limited to:

- All applicable Sanctions including those imposed by UK Government (OFSI) and the US Government (OFAC); and
- All applicable Anti-bribery, corruption and money laundering rules; and
- Appropriate Corporate Governance Standards; and
- Best in class Health and Safety standards.

Gulfsands' progress and performance in respect of sustainability and ESG is overseen and driven by the Sustainability Committee, chaired by the Managing Director. By adopting the UN's Sustainable Development Goals (SDGs) and applying a consultative mapping process specific to Gulfsands business and culture, we have selected the SDGs that apply to the three sustainability pillars, Environmental, Social and Governance. As Gulfsands is in Force Majeure and currently unable to operate its Block 26 assets, the implementation of its sustainability plan captures the key elements of the go-forward strategy, including Syria Re-Entry Strategy and Plans and Asset Field Development Plans.

Strategic Report Sustainability – Track Record

Gulfsands' track record in sustainability

Prior to sanctions/force majeure, between 2009 – 2011, Gulfsands supported a number of initiatives with a level of financial assistance, activities and logistical support in Syria, including local communities and social and charitable organisations. Efforts were focused towards supporting programmes aimed to improve the health, welfare and prospects of children, women and the disadvantaged members of society, especially for people living in the North-East Syria, and central Damascus. These initiatives included:

Education:

- Schools in villages local to the Khurbet East and Yousefieh oil fields: Including provision of internet access, computers, peripherals and supplies, as well as the refurbishment of dedicated classrooms and programmes to train teaching staff;
- Financial and logistical support for organisations (such as FIRDOS, BIDAYA, SHABAB, AWRD and the Syrian Young Scholars), which provide access to education and educational infrastructure such as mobile libraries, micro finance and assistance for the development of micro-businesses.

Healthcare:

- Providing funding to BASMA (Children with Cancer) at the Al Buruni University Hospital in Damascus, and the Children's Hospital in Damascus;
- BANA (the Syrian institute for the Blind), where Gulfsands assisted to complete the construction of a facility and equipment for a computer-based Braille teaching programme and the construction and population of a digital audio library at BANA's Damascus headquarters;
- Support to AAMAL, the Syrian Organisation for the Disabled, the Syrian Association for Autistic Children which provides teaching and support facilities for children with learning difficulties, and the Light and Flowers Centre for Cerebral Palsy.

Culture:

- Funding for carbon dating and forensic work on discoveries made during the archaeological excavation of an ancient Urkesh Palace at the Tell Mozan site near to Block 26 in North-East Syria. Further details about this important work and the Gulfsands Urkesh Exploration Fund can be viewed at www.urkesh.org.

When the situation permits, Gulfsands will reactivate societal and charitable programmes to improve the health, welfare and prospects of people living in North-East Syria, and central Damascus, specifically children, women and disadvantaged members of society.

Strategic Report Sustainability – Recent Community Initiatives

Recent Community initiatives

The program, delivered by Phoenix Space in collaboration with the Chaffinch Trust and supported by Gulfsands, completed in February 2023. It provided Syrian refugee children aged between 14-16 years old with an introduction to Science, Technology, Engineering, and Mathematics (STEM) fields designed with the inspirational theme of space science.

The Phoenix Space's Flagship STEM program was created to spark an interest in STEM fields among underprivileged youth and provide them with the foundational knowledge of algebra, geometry, and Newtonian mechanics, as well as the introduction to programming and space science. The students participated in a wide range of activities that fostered their creativity and developed their problem-solving and critical-thinking skills. The introduction to basic scientific investigation helped the participants to understand what science, math, programming and engineering aim to do, and what problems they can solve.

The students who attended the course expressed great enthusiasm for the knowledge they have received and the activities they completed during the course. Amar (14 years old) is a Syrian refugee who moved to Jordan four years ago,

says: 'I really enjoyed the Phoenix Space program, especially the maths and physics activities such as making rockets and kites. I think the program will not only help me do well at university but will also help in real life situations.'

The completion of this pilot STEM program marks a significant achievement for the students and the community. To mark the end of the program, some of the Phoenix Space and Chaffinch Trust team met with John Bell, Managing Director of Gulfsands and the students and facilitators in Jordan.

John Bell commented: "It was my great pleasure to be invited to visit Jordan and see first-hand the inaugural cohort powered by The Chaffinch Trust and Phoenix Space partnership. Together, we were able to deliver a STEM based education program in Amman, Jordan, designed for refugee children aged between 14 - 16 years. The completion of the STEM program marks a significant achievement for the students and the community. The pilot program in Jordan also marks an important milestone in the collaboration between Phoenix Space and Chaffinch Trust, supported by Gulfsands, and we look forward to continuing working together by providing displaced and underprivileged youth, quality education and empowering them to take part in transforming their lives and their communities".

Strategic Report

Strategic Priorities and Monitoring Performance

The following tables set out our current strategic priorities and how we seek to progress towards their realisation:

STRATEGIC IMPERATIVES	COMMENTARY
Protection, Preservation and Preparation for Re-entry of our Syrian interests	<ul style="list-style-type: none"> We continue to seek to preserve all contractual rights and manage business relationships in a manner consistent with all relevant sanctions and Force Majeure status. We seek the political support of the international community to help enable a controlled and coordinated return to operations, when the time is right. Our local management team in Syria ensures strong local expertise and presence. Technical readiness to return continues to be fine-tuned and has been independently validated by OPC. Rigorous re-entry planning process in progress to maintain readiness to return to conducting operations as soon as circumstances permit (see page 25). Gulfsands is pioneering "Project Hope" a Humanitarian and Economic Stimulus initiative whereby international energy companies would return to operations in North-East Syria, with allocated revenues from oil sales deposited in an internationally administered fund and disbursed to finance early recovery, humanitarian, economic and security projects across the country – for the benefit of all Syrian people.
Comprehensive evaluation of new business opportunities	<ul style="list-style-type: none"> As the Group increases its focus on business development, effective evaluation and risk assessment will become critical to success. Strong technical team is in place to identify and scrutinise opportunities as they arise.
Rationalisation of the portfolio to fit the Company's financial and risk appetite	<ul style="list-style-type: none"> This exercise is now complete with the confirmation of the mutual termination of the Llanos-50 licence in Colombia in early 2022. This resulted in the elimination of a potential \$15.2 million work program liability and the recovery of £1.22 million (~\$1.52 million) of previously provided-against restricted cash, in May 2022. The orderly administrative exit from Colombia is now complete, with the in-country branch formally liquidated during 2022, by way of a solvent liquidation. Official confirmation was received in early February 2023.
To build a sustainable Business model including maintaining HSES and community relations	<ul style="list-style-type: none"> Increased focus on Sustainability and ESG in all business activities. Continued community, security and environmental assessment processes incorporated into all our operations planning, including: all new business initiatives and Syria Re-entry Planning. No recordable HSES incidents during the year.
Ensure the Group is efficiently run and well financed	<ul style="list-style-type: none"> Maintained control over costs. Maintained support of the Major Shareholders while also exploring potential additional sources of finance. £1.25 million was drawn down under the 2017 Facility during the year. A drawdown notice for £0.75 million was issued post year-end in April 2023. £0.75-£1 million under the 2017 Facility remains available for General and Administrative costs in H2 2023. Up to £2.5 million for potential business development may be available, subject to Major shareholder consent and will be assessed, as required, based on opportunities identified. Operating costs funded to the end of 2023. The Board continues to discuss funding needs, and sources of funding, for 2024 and beyond with the Major Shareholders.

Key Performance Indicators ("KPIs") provide a means of measuring our progress in delivering our strategic objectives. The Group has identified five key performance indicators in respect of its corporate strategy. Further sustainability related KPI's will be developed as operations increase.

KPI	PERFORMANCE	COMMENTARY AND TARGET																
Contingent and Prospective working interest Resources (mmboe): <ul style="list-style-type: none"> 2C Contingent Resources and best estimate Prospective Resources are both stated on an unrisks, pre-royalty, working interest basis All Contingent and Prospective Resources relate to Block 26 in Syria which is currently in Force Majeure (see pages 22 – 23 for further details). 	<table border="1"> <thead> <tr> <th colspan="2">CONTINGENT RESOURCES</th> </tr> </thead> <tbody> <tr> <td>2022</td> <td>73.5</td> </tr> <tr> <td>2021</td> <td>76.4</td> </tr> <tr> <td>2020</td> <td>80.1</td> </tr> </tbody> </table> <table border="1"> <thead> <tr> <th colspan="2">PROSPECTIVE RESOURCES</th> </tr> </thead> <tbody> <tr> <td>2022</td> <td>545</td> </tr> <tr> <td>2021</td> <td>546</td> </tr> <tr> <td>2020</td> <td>546</td> </tr> </tbody> </table>	CONTINGENT RESOURCES		2022	73.5	2021	76.4	2020	80.1	PROSPECTIVE RESOURCES		2022	545	2021	546	2020	546	<p>In 2015 the Reserves held for Block 26 in Syria were re-classified as Contingent Resources as there was no certainty over when the development of the assets would resume (in particular the fact that there was no guarantee that it would be within five years). This classification has been maintained since then. The Group remains ready to return to production and reclassify these Contingent Resources back to Reserves as soon as circumstances allow.</p> <p>During 2019 Gulfsands' technical work was reviewed by Oilfield Production Consultants ("OPC") who produced a Competent Person's Report ("CPR"). OPC's CPR, which has been rolled forward to each subsequent year-end including 31 December 2022, resulted in 2C Contingent Resources of 73.5 million boe as at 31 December 2022. All the Contingent Resources numbers take into account unauthorised production taken from the Block 26 assets during the period (Gross: 2022: 6.0 million boe, 2021: 7.0 million boe, 2020: 7.4 million boe). The 2019 CPR performed by OPC also confirmed additional mid-case unrisks Prospective Resources, relating to nine identified prospects within Block 26, of 545 million boe, which has been reviewed each year remained unchanged since then.</p> <p>The Group's business development initiatives will include the potential acquisition of further Reserves and/or Resources in the Middle East and broader MENA region, as well as the identification of additional Resources within Block 26.</p>

Strategic Report

Principal Risks and Uncertainties

The Group's approach to risk management aims to identify material risks as early as possible, to reduce or eliminate the probability of those risks occurring, and to mitigate, to the greatest extent practicable, the impact on the Group if an event does occur.

All staff within the Group take an active responsibility for identification of potential risks to the Group, to ensure these are communicated to the appropriate person, and to participate in the mitigation processes.

The Group considers its principal risks and uncertainties to be as follows:

GEOPOLITICAL RISKS	
Nature of Risk	Mitigation
<p>The Group's core assets are based in Syria. This country continues to be subject to political uncertainty and its society and infrastructure have been damaged significantly by civil war.</p> <p>The Group's interests in Syria are in Force Majeure as a consequence of UK Sanctions being imposed. There is no indication that these sanctions will be relaxed in the immediate future.</p> <p>It is not possible at this stage to predict how the Syrian authorities will interpret the contractual position relating to the Company's interests once sanctions are lifted and activity resumes, including the extension of the licence period to take account of the period of Force Majeure.</p> <p>This inability to operate also means that Gulfsands has no control over the day-to-day operations of Block 26, including the control of any unauthorised production.</p>	<p>The Group's ability to mitigate these risks is limited. However, the Group liaises closely with the UK authorities, and other available resources, to monitor and assess the geopolitical situation.</p> <p>The Group has declared Force Majeure and believes that its legal rights should be preserved upon its return to operations when circumstances allow.</p> <p>The Group is undertaking extensive work to prepare itself for the time when sanctions are lifted, and it can resume operation of the assets with our partners.</p> <p>The Group is not affiliated to any government, political party, religion, ethnic grouping or similar organisation, but seeks to maintain good relationships with communities and important local stakeholders.</p> <p>Where possible, and within the constraints of UK Sanctions, the Group continues to monitor information available in respect of field and geopolitical activity in respect of Block 26 and seeks to defend its rights against any unauthorised or unlawful activity.</p> <p>Gulfsands continues to step up its engagement with key stakeholders, including regional and international governments, and stands ready to play its part, to the extent sanctions allow, in any agreed UN-sponsored initiatives that can help resolve the current crisis.</p> <p>The Company is pioneering "Project Hope" a Humanitarian and Economic Stimulus initiative whereby international energy companies would return to operations in North-East Syria, with allocated revenues from oil sales deposited in an internationally administered fund and disbursed to finance early recovery, humanitarian, economic and security projects across the country – for the benefit of all Syrian people.</p>
FINANCING	
Nature of Risk	Mitigation
<p>The Group currently has no revenue, with its only producing assets being in Syria and subject to UK Sanctions.</p> <p>The Group is dependant entirely upon external financing to support any activity but its ability to attract and support such financing is constrained severely by the uncertainty surrounding the future of its principal assets.</p> <p>The Group is therefore particularly reliant on the continued support of its Major Shareholders who have been the only sources of significant funding over the past 7 years.</p> <p>Further discussion regarding the current funding situation is contained in the going concern note 1.3a to the Consolidated Financial Statements.</p>	<p>The cost base and funding requirements of the business are continually being assessed to ensure ongoing efficiency and to minimise the requirements for cash injections.</p> <p>General & Administrative costs remain a key focus and current committed financing from the Major Shareholders is expected to fund the Group to the end of 2023.</p> <p>The Board maintains a close relationship with its Major Shareholders and seeks to confirm regularly their willingness to continue to support the Group.</p> <p>The Board continues to discuss funding needs, and sources of funding, for 2024 and beyond with the Major Shareholders.</p> <p>The Board continues to assess additional potential sources of financing particularly in respect of business development initiatives.</p>

SHAREHOLDER CONCENTRATION

Nature of Risk	Mitigation
<p>As a result of the financing constraints, a large proportion of the shares in the Company are held by two shareholders holding approximately 57.75% and 25.62% respectively (the "Major Shareholders").</p> <p>While access to sources of finance is an absolute priority, concentrated share ownership can enable those shareholders to exert influence on the Board and management which may reflect their interests to the detriment of the minority shareholders.</p> <p>In particular, Waterford is unilaterally able to propose and pass, or block an ordinary resolution of the Company, and Waterford and Blake can together propose and pass, or block a special resolution of the Company.</p>	<p>Even post delisting, the Board has sought to continue to maintain high levels of corporate governance.</p> <p>Following delisting from AIM in April 2018, a secondary market trading facility (off-market dealing facility, www.assetmatch.com) has been secured to enable existing shareholders and new investors to trade Ordinary Shares by matching buyers and sellers through periodic auctions.</p>

HEALTH, SAFETY, ENVIRONMENT, SECURITY AND SUSTAINABILITY

Nature of Risk	Mitigation
<p>The Group's licence to operate is critically dependent on:</p> <ul style="list-style-type: none"> the protection of the health and safety of its staff, its contractors and members of the community in which it operates; the protection of the environment in which it operates; and the security of its interests and assets. <p>Failure in respect of these matters could severely impact on the Group's ability to work and obtain further business in its areas of operation as well as putting it at risk of legal and financial liabilities.</p>	<p>The Group maintains best practice policies and procedures in these areas and seeks to manage its business and its contractors in accordance therewith.</p> <p>During the Covid-19 crisis Gulfsands put the health and safety of its staff as a priority and sought to follow all applicable government guidance in areas where it operated.</p> <p>The Group has reviewed its internal policies and adopted provisions to allow employees to work effectively remotely when necessary.</p> <p>The implementation of the Company's Sustainability framework and Sustainability Committee have increased the focus on this important area.</p>

COMPLIANCE: BRIBERY AND CORRUPTION, UK SANCTIONS

Nature of Risk	Mitigation
<p>The Group's licence to operate depends on its continued compliance with a range of relevant regulations including those relating to sanctions and bribery and corruption.</p> <p>These regulations are complex, and interpretation of their implications requires the Group to seek advice which is sometimes not definitive.</p> <p>The Group's failure to comply with such regulations could have a significant impact on its ability to operate as a result of reputational damage, legal liability and financial loss.</p>	<p>The Group has a Code of Business Conduct which applies to all activities of the Group. This is complemented by specific sanction and anti-bribery guidance and policies. Business practices are reviewed against this code, guidance and policies.</p> <p>Formal training and monitoring is provided across the Group particularly in respect of bribery, corruption and sanctions compliance.</p> <p>Professional advice is sought where required and periodic briefing is received to update the Board on developments in the regulatory framework.</p>

RELIANCE ON KEY STAFF

Nature of Risk	Mitigation
<p>The Group has a small staff of experienced people and relies heavily on their knowledge and experience in developing and delivering the Group's strategic objectives.</p> <p>There is therefore a heightened risk of loss of management continuity and impairment of the business model.</p>	<p>The Group undertakes internal succession planning where possible together with maintaining contact with a network of experienced people in the industry, including consultants on whom it may call if required.</p> <p>Contracts with key personnel have notice periods that allow sufficient time to source replacements.</p>

BUSINESS DEVELOPMENT AND OPERATIONAL SUCCESS/FAILURE

Nature of Risk	Mitigation
<p>The Oil and Gas industry is a high-risk industry especially in the exploration and appraisal phases of projects.</p> <p>The Group's business development strategy is, to a significant extent, dependent upon achievement of exploration and operational success.</p> <p>Failure to select and implement successful projects will impact the Group's financial performance and ability to finance the growth and development of the Group.</p>	<p>Technical risks are mitigated by careful analysis of the available geological, geophysical and petrophysical data prior to drilling.</p> <p>Financial risks are mitigated by rigorous economic modelling based on chance of success and a range of possible outcomes, prior to an acquisition, and before commencement of individual operations.</p> <p>An integrated approach is critical to all business development decisions.</p>

Strategic Report Operations Review

SYRIA

Gulfsands is the operator of the Block 26 Production Sharing Contract (“PSC”) and holds a 50% working interest in the PSC along with Sinochem Group (also 50% working interest).

Gulfsands is not presently involved in any production or exploration activities on Block 26 as Force Majeure has been declared in respect of the PSC following the introduction of UK Sanctions in respect of Syria.

The Group seeks to ensure that it remains compliant with all applicable sanctions in relation to Syria and intends to return to production and exploration activities as soon as permitted.

POSITION DURING 2022

- Continued compliance with applicable sanctions.
- According to in-country sources, Block 26 facilities, wells and infrastructure are understood to remain secure and predominantly functional.
- Unauthorised production, undertaken by the SDC/SDF and its affiliates, has continued during the year at a rate of approximately 16,500 boepd.
- Office presence maintained in Damascus.
- Increased focus on readiness to re-enter when permitted, including continued internal technical re-work of existing data, as recommended in the Competent Persons Report (“CPR”) by OPC.
- Continued to develop the humanitarian and economic stimulus “Project Hope”.

Block 26 is located in North-East Syria. The PSC grants to the joint venture (i.e. Gulfsands and Sinochem) the exclusive right for the exploration, development and production in an area designated as “Block 26”. This includes the rights to the benefits of production from discovered fields for a minimum of 25 years from the date of initial commercial production from such development area, with an extension of a further ten years thereto at the partners’ option. Gulfsands’ joint venture partner in Block 26 is Sinochem Group, a Chinese conglomerate primarily engaged in the production and trading of chemicals and fertilizer, and exploration and production of oil.

Under the Group’s operatorship, two oil fields containing reservoirs of Cretaceous age have been discovered, appraised and approved for Development within the PSC area, Khurbet East (2008) and Yousefieh (2010). During 2011, combined production from these fields reached a level of just under 25,000 barrels of oil per day before the impact of EU/UK Sanctions resulted in the curtailing of production levels. Two additional oil and gas discoveries within reservoirs of Triassic age have been identified within the Kurrachine Dolomite and Butmah formations, beneath the Cretaceous aged oil producing reservoir in the Khurbet East field. Development approvals for these Triassic discoveries were granted in 2008 and 2011 respectively. A further oil discovery was made late in 2011 by Gulfsands in the Cretaceous aged reservoirs penetrated by the Al Khairat exploration well, a few kilometres east of the Yousefieh field. This discovery awaits further evaluation and development work and is not currently incorporated into the Company’s existing Production Licence areas, although an application has been prepared and will be submitted as soon as sanctions allow.

Operation of the Khurbet East and Yousefieh fields during the production phase has been undertaken by Dija Petroleum Company (“DPC”), a joint operating company formed between Gulfsands, Sinochem and Syrian state oil company, General Petroleum Corporation (“GPC”) for the purpose of undertaking the management and control of petroleum production operations and related infrastructure on Block 26. Staff of both Gulfsands and GPC were previously seconded to DPC. As a consequence of the EU’s imposition of further sanctions in Syria which came into effect in early December 2011, in accordance with the terms of the PSC for Block 26, a Notice of Force Majeure was served on GPC, the principal counterparty to the PSC and the Syrian Ministry of Petroleum and Mineral Resources. The imposition of these sanctions prohibited Gulfsands’ involvement in petroleum production operations in Syria and restricted its activities in relation

to Block 26 generally, and unless and until these sanctions (now UK Sanctions) are lifted or otherwise modified so as to permit the Company’s return to its prior involvement in those activities, the Company will be obliged to maintain its current position with respect to Block 26 PSC matters.

It should be noted that following the Company’s service of its Notice of Force Majeure and various legal steps taken by GPC, GPC has assumed operational control and responsibility for the management of DPC. Since the introduction of EU (now UK) Sanctions in early December 2011 and the subsequent declaration of Force Majeure under the PSC, Gulfsands has had no involvement with the operations of DPC, and Gulfsands staff seconded to DPC have been withdrawn, leaving DPC under the management of GPC secondees.

The Group has ensured that it remains compliant with all applicable sanctions in relation to Syria and intends to return to production and exploration activities as soon as permitted and conditions allow.

Exploration

The final exploration period of the PSC was due to expire in August 2012, nine months after the declaration of Force Majeure. The Company believes it is well positioned to progress a significant exploration work programme and will make its case for the reinstatement of this lost time period to undertake such a programme at the time of re-entry. This exploration work programme and related prospects were reviewed by OPC as part of the CPR process.

Production

Since December 2011, Gulfsands has received periodic updates from DPC on hydrocarbon volumes produced from the Group’s Syrian fields under DPC’s operation. These updates have often

been received on an infrequent and irregular basis and it has not been possible for Gulfsands to audit or verify the content of the information provided.

In early 2017 the Company was informed by DPC that the Group’s Syrian fields had returned to significant and regular production. In-country sources, as well as several publicly available international news sources, confirm that this ongoing production continues and have identified that this production is undertaken by the Syrian Democratic Council/Syrian Democratic Forces (“SDC/SDF”) and its affiliates. The unauthorised production covers all three fields of Khurbet East, Yousefieh, and now Al Khairat. The production is described by GPC/DPC as “stolen”.

The average production rate from the three fields combined between January 2017 and 31 December 2022 appears to be around 20,000 boepd, and reports indicate that the average production during the year was around 16,500 boepd giving total unauthorised production during 2022 of around 6.0 million barrels of oil equivalent made up of 5.4 million barrels of oil and 3.8 Bcf of gas (2021: 7.0 million boe).

Cumulative gross unauthorised production since early 2017 is approximately 40.8 million boe (2017: 6.4 million barrels, 2018: 6.9 million barrels, 2019: 7.1 million barrels, 2020: 7.4 million barrels, 2021: 7.0 million barrels, 2022: 6.0 million barrels).

The Company has been unable to independently audit the precise production numbers from DPC and has been unable to visit the fields for several years due to an inability to get security clearance. The Company, whilst remaining sanctions compliant, continually seeks to gain additional information regarding the ongoing status of production operations at its Syrian fields.

This production is unauthorised, unlawful and breaches the Company’s contractual rights and the Board is determined to protect itself by asserting and defending its rights against this

Strategic Report

Operations Review (continued)

and indeed any unlawful activity in respect of Block 26. The Group has not recognised or received any revenue for this or indeed any production, post the imposition of UK Sanctions. It has however, updated its remaining recoverable resource volumes for these fields, based on this new production information.

Since the date of the first commercial oil production from the Block 26 area by the Group, cumulative oil production from the Group's fields is understood to have exceeded 66.4 million barrels by year end 2022 (End of 2021: 60.4 million barrels), of which around 47.7 million barrels (2021: 41.7 million barrels), have been produced since Force Majeure was declared, and without the involvement of Gulfsands.

Reserves and Resources

Up until 2015, hydrocarbons related to the known discoveries of Yousefieh and Khurbet East were classified as Reserves. During 2015 these Reserves were reclassified to Contingent Resources as a result of the continuing UK Sanctions in Syria. The Company recognises that it cannot give a definite timeline for the resumption of the development of the discovered fields within Block 26 that was suspended following the declaration of Force Majeure in 2011. In such a circumstance the SPE PRMS Guidelines suggest that if the (re)commencement of development cannot be guaranteed to be within five years from the date of evaluation then the volumes of hydrocarbons should be classified as Contingent Resources rather than Reserves. The Company concluded in December 2015 that the uncertainty in any timeline over which UK Sanctions in Syria may be lifted required that the volumes of oil, gas and condensate previously reported as Syrian Reserves be reclassified by the Company as Contingent Resources.

Since 2015 this classification as Contingent Resources has continued, even though, as at 31 December 2022, the Board believes that UK Sanctions will be lifted well within five years (its base case assumption for the impairment review is three years). The Board will continue to monitor all activity focused on resolving the situation in Syria and will reconsider the basis for reversing this reclassification in line with any future developments.

Unrisked working interest basis As at 1 January 2023

	Constituent	1C	2C	3C
Syria Block 26				
(Working interest 50%)				
Khurbet East and Yousefieh	Oil, Condensate and Gas, mmmboe	38.3	63.3	89.6
Al Khairat discovery	Oil and Gas, mmmboe	4.8	10.2	18.1
Total	mmmboe	43.1	73.5	107.7

Please note, certain figures may not add up due to rounding.

Oil includes condensate and NGLs.

Gas is converted to mmmboe at the conversion factor 1 bcf = 0.1667 mmmboe

Over recent years, the Gulfsands team has undertaken significant internal technical work to review estimated resources as part of the preparation for its return to Syria when circumstances allow. During 2019, independent consultants, Oilfield Production Consultants ("OPC") were commissioned to review, audit and validate this work, and prepare a Competent Persons Report ("CPR") for the Board. This exercise included a comprehensive review of the Block 26 exploration and production interests (Contingent Resources and Prospective Resources) in accordance with the definitions and guidelines set forth in the 2018 Petroleum Resources Management System ("PRMS") approved by the Society of Petroleum Engineers ("SPE").

In estimating the Resources, it has been assumed that the period of time elapsed during which the Group has declared Force Majeure on its Block 26 development and production activities, will ultimately be added as an equivalent time period extension to the contractually specified Exploration Period and Production Concession Periods, though there can be no guarantee that this extension will be granted.

Contingent Resources

The Group has evaluated, and was supported in its view by the CPR, that it holds within the Massive, Butmah and Kurrachine reservoirs of Khurbet East field, and the Massive of the Yousefieh field, working interest basis 2C Contingent Resources of 61.0 mmmbbls of oil and condensate, and 30.4 bcf of gas (equals 5.1 boe). The Group has also evaluated, and was supported in its view by the CPR, that the oil discovery at Al Khairat contains 2C Contingent Resources of 10.3 mmmbbls of oil (working interest basis).

The CPR was originally undertaken effective 1 January 2019 but has been rolled forward, updated and reconfirmed as of 31 December 2022, taking into account, amongst other things the production that has occurred during 2019, 2020, 2021 and 2022.

Prospective Resources

OPC reviewed the portfolio of nine identified prospects within Block 26, and in doing so, validated them as Prospects under PRMS definitions and also estimated associated Prospective

Resources, on a risked and un-risked, pre-royalty basis. This work was rolled forward, updated and reconfirmed as of 31 December 2022, and is summarised below:

Prospective Resources (Unrisked)

The following table is a summary of OPC's estimate of the oil and gas Prospective Resources (Unrisked) attributable to Block 26 as of 1 January 2023. The figures are based on Gulfsands net 50% working interest ownership:

	Constituent	Low	Mid	High
Total Oil	mmstb	154	320	542
Total Gas	Bscf	877	1,355	1,945
Total Resources	mmmboe	300	545	866

Prospective Resources (Risked)

The following table is a summary of OPC's estimate of the oil and gas Prospective Resources (Risked) attributable to Block 26 as of 1 January 2023. The figures are based on Gulfsands net 50% working interest ownership:

	Risked HClIP (mmmboe)	Risked Prospective Resources (mmmboe)
Total	419	134

Economic Evaluation

OPC also undertook an economic evaluation of the Block 26 project and have updated such evaluation periodically since, though of course these evaluations did not take into account any of the above-ground risks associated with the assets.

Any valuation is sensitive to input assumptions including discount rates used, preservation of current PSC terms, oil price assumptions, timing of resumption of operations, and anticipated capex and opex costs including cost inflation. The OPC Economic Evaluations considered these factors, including related sensitivities. This sensitivity analysis indicates a central range of Expected Monetary Value ("EMV") of the Block 26 assets, including both Contingent and Prospective Resources, of \$1 billion - \$1.5 billion (net to Gulfsands).

Note that this economic evaluation was independent of the impairment review undertaken for the valuation of the Investment in Dija Petroleum Company, which is explained in more detail in note 4.2.

Sanction compliance

Gulfsands has taken extensive legal advice with respect to its obligations under the sanctions in place and has liaised regularly with relevant regulators and advisers and has generally acted cautiously to be confident of remaining compliant with all relevant sanctions. The Board is determined to ensure that the Group's activities remain compliant, and management will continue to liaise closely with the relevant regulatory authorities and advisers to ensure this objective is achieved.

Plans For 2023

Gulfsands will continue to do all it can to preserve and protect its rights and assets in Syria as well as prepare its readiness for returning to operations as soon as circumstances allow.

While the macro situation is, of course, beyond the control of Gulfsands alone, management will continue to lobby the international community to find a solution to the situation in Syria for the benefit of all, especially the Syrian people. Gulfsands stands ready to play its part, to the extent sanctions allow, in any agreed UN-sponsored initiatives that can help resolve the current crisis. We intend to continue this dialogue with all stakeholders throughout the year.

In particular, Gulfsands is pioneering "Project Hope" a Humanitarian and Economic Stimulus initiative whereby international energy companies would return to operations in North-East Syria, with allocated revenues from oil sales deposited in an internationally administered fund and disbursed to finance early recovery, humanitarian, economic and security projects across the country - for the benefit of all Syrian people.

More details of "Project Hope" are available on the Company's website at www.gulfsands.com.

Strategic Report Operations Review – Syria Re-Entry Planning

Gulfsands' core Syria strategy is to Protect and Preserve its rights related to Block 26 and to Prepare for re-entry into Syria and a return to operations. While the Block 26 PSC remains in force majeure due to applicable sanctions, Gulfsands undertakes its re-entry planning in a strict observance of applicable sanctions and laws.

Gulfsands builds ESG and sustainability considerations into all its re-entry planning, as well as respecting the UN Security Council Resolution 2254, which appears to be the accepted blueprint for a Future Syria. It also maintains compliance with all local laws to protect its rights under its PSC while it remains in force majeure.

Gulfsands has undertaken a significant amount of internal technical work, formalising and analysing existing data, which has also been subject to a Competent Persons Report review by OPC as part of this re-entry preparation. The OPC review covered a Comprehensive Field Development Plan of the Contingent Resources (formerly Reserves) as well as a Comprehensive Exploration Plan for Prospective Resources within the exploration portfolio of identified prospects.

The Board believes, and the CPR has confirmed that upon re-entry, on a gross basis, Block 26 could be proven to contain over a billion barrels of recoverable resource with the potential for production levels of around 50,000 boepd from existing discoveries in the near term, and over 100,000 boepd from a full block development incorporating the potential exploration upside.

In addition to the technical aspects of the Company's projects, Gulfsands' re-entry plan also incorporates the following key objectives:

1. Support the safety and security of our in-country team and national staff.
2. Stay Legal – understand and ensure compliance with local and international laws & all applicable sanctions.
3. Protect and preserve our existing asset value in Syria by continuing to meet our PSC and other contractual obligations where possible under sanctions and mitigate value erosion and damage by non-state actors.

4. Protect the reputation of Gulfsands and partners and maintain support for Gulfsands and its partners with stakeholders globally and in-country.
5. Protect the environment: ensuring clean-up of current operations in Block 26 and implementation of leading sustainable oil field practices.
6. Sharing the benefits: Gulfsands will ensure immediate benefits flow to the Syrian people, through the generation of employment and training and community outreach programs, as well as specific Humanitarian initiatives.
7. Implement Gulfsands Re-Entry and Re-Engagement Strategy which allows us to actively and safely recommence Syrian Operations when force majeure and sanctions are lifted. This includes:
 - Stakeholder Engagement
 - ESG Plan Implementation
 - Adopt HSSE & Operational Management System
 - Journey to 100,000 barrels per day FDP Execution
 - Implementation of Legal and Financial frameworks and processes
 - IT and Digitisation roll out.

Strategic Report

Financial Review

Selected operational and financial data

	Year ended 31 December 2022 \$'000	Year ended 31 December 2021 \$'000
General and Administrative costs	(2,689)	(2,866)
Operating Loss	(1,226)	(2,867)
Loss before taxation	(1,496)	(4,191)
E&E cash expenditure	-	-
Cash and cash equivalents	1,108	884
Restricted cash balances	500	500

Financial highlights for the year ended 31 December 2022

- The loss for the year from continuing operations was \$1.5 million (2021: \$4.2 million).
- The Operating Loss for the year of \$1.2 million (2021: \$2.9 million).
- \$1.52 million of restricted cash from the Llanos-50 licence was recovered, which was the main contributor to the reduction in the Operating Loss.
- General and Administrative costs decreased by \$0.2 million in the year due to specific corporate finance initiatives in 2021.
- The Group continues to hold its investment in its Syrian interest at a carrying value of \$102.0 million.
- Two funding tranches of £0.5 million and £0.75 million were drawn down during the year (in March 2022 and November 2022 respectively) under the 2017 Secured Term Financing Facility ("2017 Facility").
- As at year-end two further tranches of up to £750,000 and £1 million each were available on or after 31 December 2022 and 30th June 2023.
- In April 2023, a drawdown request for £0.75 million was made under the terms of the 2017 Facility.
- Consequently, as at the date of this report, one drawdown of between £0.75-£1 million remains to be drawn down in H2 2023.
- An additional tranche of up to £2.5 million for specific potential business development activity may be available subject to Major Shareholder consent.
- Cash and cash equivalents were \$1.11 million at 31 December 2022 (31 December 2021: \$0.88 million).

INCOME STATEMENT

The Group reported a loss before tax for the year ended 31 December 2022 of \$1.5 million (2021: \$4.2 million).

General and administrative expenses

	Year ended 31 December 2022 \$'000	Year ended 31 December 2021 \$'000
Gross General and Administrative Expenses	3,265	3,442
Partner recoveries	(576)	(576)
General and Administrative Expenses	2,689	2,866

General and Administrative Expenses for the year ended 31 December 2022 totalled \$2.7 million (2021: \$2.9 million). This decrease was due to specific corporate finance projects undertaken in 2021, such as the Mandatory Offer initiative in 2021.

The Company's Llanos-50 licence was officially terminated by mutual consent with the ANH in May 2022. Further details of the Llanos 50 and its termination are explained in note 2.4 to the Consolidated Financial Statements

Because the termination was only confirmed in 2022, as at 31 December 2021, an intangible exploration and evaluation ("E&E") asset relating to Llanos-50 was maintained at \$2.29 million representing capitalised expenditures from inception to-date, albeit fully impaired. Alongside this, a restricted cash balance of \$1.8 million held as a performance guarantee in relation to the minimum work obligation under this contract was also fully provided against as it was in prior years. In May 2022, £1.22 million (~\$1.52 million) of this restricted cash was released back to the Company by the ANH. The accounting for both these items is included in 2022, with the elimination of the E&E asset (no P&L effect as it was fully impaired) and the recovery of the performance guarantee (which created a credit to P&L of \$1.52 million).

Foreign exchange gains totalled \$1.21 million (2021: \$0.18 million gains). Non-cash Interest on the 2017 Facility was \$1.4 million in 2022 and 2021 (2022: £1,196k, 2021: £1,028k).

BALANCE SHEET

Exploration and Evaluation Assets

The Group's E&E assets are held at a net book value of \$nil at 31 December 2022 (31 December 2021: \$nil million). The Llanos-50 licence was written off in 2022 as a result of the mutual termination of that contract, though there was no P&L impact as it had already been fully impaired. Certain exploration licence costs in Syria which are in force majeure, remain but have been fully impaired.

Syria Investment

The Group's investment in Dijla Petroleum Company ("DPC"), the entity established in Syria, pursuant to the Block 26 PSC, to administer the Group's Syrian oil and gas development and production assets (and which for valuation purposes is considered to also include the related rights to production under the PSC), is recorded as a "Financial asset held at fair value through other comprehensive income". Due to the unknown duration of UK Sanctions in force against Syria and uncertainty over the eventual outcome of events in the country, any valuation attributed to the investment is highly subjective and there are a wide range of possible fair value measurements. Management reviewed its internal valuation methodology and continues to believe that as a result of the passage of time and the high degree of judgement required, it is not possible to reliably estimate the investment's fair value. Management, continues to consider that the historical

cost figure of \$102 million, represents an appropriate estimate of fair value, given there is a wide range of possible fair value measurements, being the last valuation which could be reliably determined. This value is reviewed at least annually for impairment and any impairment losses recognised through the Income Statement.

At 31 December 2022, management has carried out an impairment review, using an economic model of the estimated future cash flows that could be generated in respect of the Group's entitlement volumes (Contingent Resources) in Block 26 (see note 4.2 for details). This model was reviewed and updated as part of the Competent Person Report update review by OPC. The Board continues to consider that its position in respect of its Block 26 interests remains strong, and expects Gulfsands and its partner's rights will be honoured and that it will be able to return to operational control of its interests in accordance with the terms of the PSC, as soon as circumstances permit. While no definite timeline can be substantiated for the resumption of the full field development of the discovered fields in Block 26, the Board continues to believe that the UK Sanctions will be lifted, or waivers and/or licences received, within the next five years and, based on the current situation in Syria, the Board has concluded, as it did last year, that its "base case" assumption for impairment calculation purposes to be a resumption of operations in three years.

The 'base case' economic model calculates, as at 31 December 2022, a gross contractor undiscounted NPV(0) of \$2.74 billion, meaning a Gulfsands 50% interest undiscounted NPV(0) of \$1.37 billion, as well as Gulfsands 50% interest discounted NPV(10) of \$491.5 million and Gulfsands 50% interest discounted NPV(15) of \$334 million. Therefore, management believes no impairment is necessary and has maintained the \$102 million carrying value on the Balance Sheet at year end. Following consideration, management conclude that it is premature to revalue the carrying value upwards to reflect the potential NPV values, given the ongoing risks and uncertainties associated with the Syrian assets.

In a separate exercise, initially as part of the 2019 CPR, OPC undertook an economic evaluation of the Company's entire Block 26 assets including both Contingent and Prospective Resources. This evaluation is updated each year-end and while it does not take into account any of the above-ground risks associated with the assets, it does consider a range of possible valuation scenarios and continues to indicate a central range of risked Expected Monetary Value ("EMV") of the Block 26 assets, including both Contingent and Prospective Resources, of \$1 billion - \$1.5 billion (net share to Gulfsands).

The Directors have reviewed the carrying value of this Financial Asset held at fair value through other comprehensive income, at 31 December 2022 and are of the opinion that the carrying value, although subject to significant uncertainty, remains appropriate in the circumstances.

Strategic Report

Financial Review (continued)

Financing

During the year, the thirteenth tranche of £0.5 million (~\$0.6 million) and fourteenth tranches of £0.75 million (~\$1.0 million) each of the 2017 Facility were drawn down in March and November respectively.

In April 2023, a drawdown request for £750,000 was made under the terms of the 2017 Facility. One remaining tranche remains available for drawdown of between £750,000 and £1 million which is expected to be drawn down in H2 2023 and fund the company to the end of 2023.

The maturity of the 2017 Facility is 31 December 2023. The 2017 Facility is convertible at a fixed price of 5 pence per share at the option of either the Lenders (at any time), or, assuming no default exists, the Company (at maturity).

Further details of the 2017 Facility are outlined in note 3.6.

As at 31 December 2022, the Group had \$14.9 million (£12.3 million) (2021: \$15.0 million [£11.1 million]) of debt outstanding including accrued interest and fees under the 2017 Facility. Under applicable accounting standards (IFRS 9) this debt is represented in the balance sheet as \$13.3 million debt liability and \$3.3 million equity, totalling \$16.6 million, to reflect the split between the discounted value of the debt and the resulting equity value as at the time of the extension in December 2021, and at each drawdown date. Although there is no interest payable under the new terms of the 2017 Facility, a non-cash effective interest rate of 12% is accrued on the discounted debt liability over the life of the facility, to reflect the Directors' view of the arm's length cost of funding of the business.

Cash flow

The total change in cash and cash equivalents during the year was an in-flow of \$0.2 million (2021: \$0.1 million net out-flow). Net cash outflow from operating activities during the period totalled \$1.3 million (2021: \$3.0 million), which was after taking into account the receipt of \$1.52 million of restricted cash securitised as collateral on the Llanos-50 was released back to the Company by the ANH, following confirmation of the mutual termination of Llanos 50. Net cash received from financing activities totalled \$1.6 million (2021: \$2.9 million), made up of cash from the drawdowns under the 2017 Facility.

Cash position

At 31 December 2022 the Group had total cash and cash equivalents of \$1.11 million (31 December 2021: \$0.88 million). Restricted cash balances at the end of the year (which are presented as long-term financial assets in the Balance Sheet) represent funds held as collateral in respect of future work obligations. The net amount, not provided against, totalled \$0.5 million (31 December 2021: \$0.5 million), and relates the Group's Syrian Block 26 interest.

Going concern

As at the date of this Report, the Group has free cash available for operations totalling approximately \$1.2 million (of which \$0.64 million is awaiting electronic transfer settlement) and ongoing general and administrative costs are expected to be approximately \$0.2 million per month. One further tranche of between £750,000 and £1 million is available under the 2017 Facility to be drawn down on or after 30 June 2023. The precise amount of this drawdown is at the discretion of the Board but after consultation with the Lenders based on the prevailing activity of the business at the time. These funds are expected to fund the Company's general and administrative costs through 2023.

Additional funding will be required by early 2024. The 2017 Facility is due to mature on 31 December 2023 and the Board is in ongoing discussions with the Lenders (who are also the Major Shareholders) regarding what happens at maturity, when both the Company and the Lenders will have the right to convert the outstanding amount thereunder into equity at 5 pence per share. These discussions also cover how the Company and Group will be funded going forward, whether it be by an extension of the 2017 Facility or some other structure.

The Directors note that the Company remains reliant on the support of its two Major Shareholders, and the Board maintains a good relationship with these Major Shareholders who continue to support the Company's strategy as outlined in this Report. Without this support, the Company would be seriously financially challenged.

As a result of its ongoing dialogue with the Major Shareholders regarding the Group's future business strategy and financing, the Board has confirmed the Major Shareholders' intention to continue to support the Group going forward. However, there are no signed funding commitments in place, as at the date of this report, beyond those in the 2017 Facility. Despite the confidence that future financing will be available from the Major Shareholders, the Company also continues to explore alternative sources of financing, in particular to finance the Group's business development ambitions.

Following completion of a review of the going concern position of the Company and Group at the meeting of the Board of Directors on 25 May 2023, including consideration of the uncertainties described above, the Board has concluded that it is confident that, with free cash available for operations totalling \$1.2 million (of which \$0.64 million is awaiting electronic transfer settlement), the remaining funds available to be drawn down under the 2017 Facility, plus any additional financing that will need to be secured beyond the current expiry of the 2017 Facility, the Company and the Group is likely to have sufficient resources to continue in operational existence for the foreseeable future, being a period not less than twelve months from the date of approval of this Financial Report. Accordingly, the Directors consider it appropriate to continue to adopt the going concern basis in preparing these Financial Statements.

Notwithstanding the confidence that the Board has in its ability to finance the Group's business, the Directors, in accordance with Financial Reporting Council guidance in this area, conclude that at this time there is material uncertainty that finance could be procured to fund ongoing costs and liabilities beyond the maturity of the 2017 Facility, and failure to do so might cast significant doubt upon the Company's and the Group's ability to continue as a going concern and that the Company and the Group may therefore be unable to realise their assets and discharge their liabilities in the normal course of business. These Financial Statements do not include the adjustments that would result if the Group was unable to continue as a going concern.

These Financial Statements consolidate the accounts of Gulfsands Petroleum plc and all its subsidiary undertakings drawn to 31 December each year.

This Strategic Report was approved by the Board of Directors on 25 May 2023.

John Bell
Managing Director
25 May 2023

Cautionary statement

This Strategic Report has been prepared solely to provide additional information to shareholders to assess the Group's strategies and the potential for those strategies to succeed.

The Strategic Report contains certain forward-looking statements. These statements are made by the Directors in good faith based on the information available to them up to the time of their approval of this report and such statements should be treated with caution due to the inherent uncertainties, including both economic and business risk factors, underlying any such forward-looking information.

The Directors, in preparing this Strategic Report, have been guided by the requirements of section 414c of the Companies Act 2006. The Report has been prepared for the Group as a whole and therefore gives emphasis to those matters which are significant to the Group as a whole.

Governance

Board of Directors

Michael Kroupeev Non-Executive Chairman

Mr Kroupeev has 28 years' experience working within the exploration and production sector. After University in Moscow and MBA at London Business School, he began his career working for Dana Petroleum plc as a Director in 1994. In 1995, Mr Kroupeev founded Waterford Finance and Investment Limited ("Waterford"). Waterford is an oil and gas focused vehicle, specialising in the financing of oil, gas and other energy related projects. He has been directly involved in the capital raising for natural resource projects and in acquiring, restructuring, developing and divesting such assets. Waterford has a number of substantial shareholdings in oil and gas companies with operations in Europe, Africa, Australasia and Former Soviet Union countries, and is a substantial shareholder of Gulfsands, holding a 57.75 percent interest in the Company. He was appointed a Non-Executive Director of Gulfsands in October 2016, and became Non-Executive Chairman in December 2020.

John Bell Managing Director

Mr Bell is a Chartered Engineer with over 30 years of experience in the energy sector having worked at Vice President or Managing Director level at BP plc, Equinor and Suncor Energy (Syria). He has spent a large part of his career in the Middle East, as well as time in North Africa, the Americas, the UK North Sea, Scandinavia and the Caribbean, where he has successfully been involved in developments, operations, corporate restructuring, refinancing and growing businesses to provide enhanced shareholder returns. He has a First-Class Honours Degree in Engineering from Strathclyde University in Scotland and studied Executive Leadership at Haas School of Business, University of California, Berkeley. Previous public company directorships include Gulf Keystone Petroleum, Tethys Petroleum where he was Executive Chairman and Aminex where he was Non-Executive Chairman. Mr Bell joined the Board as a Non-Executive Director of Gulfsands in August 2014 and assumed the role of Managing Director in July 2016.

Andrew James Morris Finance Director

Mr Morris has extensive international business experience and has advised and sat on the boards of companies, ranging from early-stage resource companies to emerging technology companies. He was founder of Persistency Capital, where he acted as both investor in, and adviser to, companies across a broad range of sectors and geographies. Previous directorships include Madagascar Oil Limited, Falcon Oil & Gas Ltd, SouthWest Energy Ltd, Kriisa Research Inc. and Direct Petroleum Exploration Inc. as well as Blake Oil and Gas Limited and various related parties. Previously, Mr Morris served as a director of Ernst & Young, where he advised a broad range of organisations on enterprise risk management including corporate governance, management reporting, financial control, operational risk and process improvement. Mr Morris holds a BSc (Hons) degree in Mathematics from Bristol University and is a Fellow of the Institute of Chartered Accountants in England and Wales. Mr Morris joined the Board of Gulfsands as a Non-Executive Director in April 2015 and became Finance Director in July 2016.

Joseph Darby Senior Independent Non-Executive Director

Mr Darby has over 45 years of experience in the energy sector, including eight years with Shell Petroleum before becoming managing director of Thomson North Sea Ltd and later the Chief Executive of LASMO plc. He has held non-executive roles at Nordaq Energy plc, British Nuclear Fuels plc, Mowlem plc, Centurion Energy Inc and Alkane Energy plc. Mr Darby was previously chairman of Mowlem plc (2005-06) and Faroe Petroleum plc (2003-07). Mr Darby was also more recently a Non-Executive Director of Bowleven plc and a Non-Executive Director of Premier Oil plc. He is currently also a Non-Executive Director at Orcadian Energy Ltd. He was appointed a Non-Executive Director of Gulfsands in November 2012.

Governance

Directors' Report

The Directors present their Annual Report together with the audited Financial Statements of Gulfsands Petroleum plc and its subsidiary undertakings (the "Group" or the "Company" or "Gulfsands") for the year ended 31 December 2022.

Any significant events since the Balance Sheet date are detailed in the Consolidated Financial Statements, however an indication of possible future developments in the business of the Group are included in the Strategic Report on pages 2 to 29.

Dividends

The Directors do not recommend payment of a dividend in respect of 2022 (2021: \$nil).

Capital structure

Equity

Details of the issued share capital, together with details of the movements in the Company's issued share capital during the year are set out in note 6.1 to the Consolidated Financial Statements. The outstanding number of Issued Ordinary Shares as at 31 December 2022 is 572,495,785. The Company has both Ordinary and Deferred Shares outstanding as explained in note 6.1. The Ordinary and Deferred Shares carry no right to fixed income. Each Ordinary Share carries the right to one vote at general meetings of the Company. The Deferred Shares have no voting rights and are not entitled to dividends.

There are no specific restrictions on the size of a holding nor on the transfer of shares, which are both governed by the general provisions of the Articles of Association and prevailing legislation. The Directors are not aware of any agreements between holders of the Company's shares that may result in restrictions on the transfer of securities or on voting rights. Details of employee share schemes are set out in note 6.1 to the Consolidated Financial Statements. No person has any special rights of control over the Company's share capital. As at 31 December 2022 all issued shares were fully paid.

Debt

The Outstanding Amount ("Outstanding Amount") under the 2017 Facility as at 31 December 2022 was \$14.9 million (£12.3 million) (2021: \$15.0 million [£11.1 million]) of debt outstanding including accrued interest and fees under the 2017 Facility. Under applicable accounting standards (IFRS 9) this debt is represented in the balance sheet as \$13.3 million debt liability and \$3.3 million equity, totalling \$16.6 million, to reflect the split between the discounted value of the debt and the resulting equity value as at the time of the extension in December 2021, and at each drawdown date. The Outstanding Amount is, at the Lenders' option, convertible into Ordinary Shares at a price of 5 pence per share. The Company also has an option to extinguish the Outstanding Amount at maturity of the 2017 Facility (provided no default exists), at 5 pence. Further details of the 2017 Facility are set out in note 3.6.

Substantial shareholders

The Company has been notified that as at 25 May 2023 the Major Shareholders held the following number of Ordinary shares of the Company:

Name	Number of shares	% of shares in issue
Waterford Finance and Investment Limited ⁽¹⁾	330,605,444	57.75%
Blake Holdings Limited	146,688,595	25.62%

(1) Company associated with Michael Kroupeev.

Qualifying third party indemnity provisions

The company has previously made qualifying third-party indemnity provisions for the benefit of its directors. These provisions remain in force at the reporting date.

Directors and their interests

The Directors who served during the year, except as noted, and their interests in the Company's shares, were as follows:

	At 31 December 2022		At 31 December 2021	
	Number of ordinary shares	Number of share options	Number of ordinary shares	Number of share options
A Morris	—	5,950,000	—	5,500,000
J Darby	100,250	—	100,250	—
J Bell	—	10,600,000	—	10,000,000
M Kroupeev ⁽¹⁾	330,605,444	1,000,000	330,605,444	1,000,000

(1) Mr. Kroupeev is an ultimate beneficial owner of Waterford Finance and Investment Limited.

Directors' interests in transactions

Details of transactions with Directors for the year ended 31 December 2022 are set out in note 6.4 to the Consolidated Financial Statements.

Statement of Directors' responsibilities

The Directors are responsible for preparing the Strategic Report, Directors' Report and the Financial Statements in accordance with applicable laws and regulations, and International Financial Reporting Standards ("IFRS") as adopted by the United Kingdom of Great Britain and Northern Ireland.

Company law requires the Directors to prepare financial statements for each financial year. Under that law, the Directors have elected to prepare the Group and Company financial statements in accordance with IFRS as adopted by the UK and IFRIC (IFRS Interpretations Committee) interpretations. Under company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Group and Company and of the profit or loss of the Group for that period.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with IFRS as adopted by the UK and IFRIC (IFRS Interpretations Committee) interpretations, subject to any material departures disclosed and explained in the financial statements; and
- prepare the Financial Statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the

requirements of the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Website publication

The Directors are responsible for ensuring the Annual Report and the Financial Statements are made available on a website. Financial statements are published on the Company's website in accordance with legislation in the United Kingdom governing the preparation and dissemination of financial statements, which may vary from legislation in other jurisdictions. The maintenance and integrity of the Company's website is the responsibility of the Directors. The Directors' responsibility also extends to the ongoing integrity of the financial statements contained therein.

Statement of disclosure to the auditor

So far as the Directors, at the time of approval of their Report, are aware:

- there is no relevant audit information of which the Company's auditor is unaware; and
- each Director has taken steps that they ought to have taken to make themselves aware of any relevant audit information and to establish that the auditor is aware of that information.

This confirmation is given and should be interpreted in accordance with section 418 of the Companies Act 2006.

Auditor

During the year, the Company held an audit tender process, following which, MHA MacIntyre Hudson were appointed as the Group and Company's auditor. Following a rebranding exercise on 15 May 2023, the trading name of the company's independent auditor changed from MHA MacIntyre Hudson to MHA. A resolution to reappoint MHA as auditor and to authorise the Directors to fix their remuneration will be put to shareholders at the Annual General Meeting.

By order of the Board,

John Bell
Managing Director
25 May 2023

Governance

Directors' Corporate Governance Report

for the year ended 31 December 2022

The Company delisted from the AIM market in April 2018 but remains a Public Limited Company ("PLC"). While non-listed companies are not subject to the requirements of the UK Corporate Governance Code on corporate governance, the Board has sought to continue to maintain appropriate standards of corporate governance, as it considers practicable for the size, stage of development and operations of the Group.

In order to communicate the Group's business conduct standards to employees, contract staff and contractor personnel across the Group, the Board has established a Code of Business Conduct and Ethics which is supported by detailed internal policies and procedures. Compliance with the Code of Business Conduct and Ethics is a contractual requirement for all personnel.

The Gulfsands Board

The role of the Board

The Board sets the Group's strategic objectives taking into account the financial and human resources available within the Group to meet these objectives. The Board determines the Company's key policies, values and standards, effectively communicating these throughout the Group. Periodically, the Board reviews the potential risks to the Group and ensures the probability of these risks affecting the business are minimised via management and mitigation.

The Board's role is to provide entrepreneurial leadership of the Group within a framework of effective controls and periodic reporting; this enables operational and financial performance to be actively monitored and managed.

The composition of the Board

Gulfsands' business carries political, commercial and technical risks. Accordingly, particular attention is paid to the composition and balance of the Board to ensure that it has experience of the oil and gas industry, the regulatory environments in which the Group operates and has appropriate financial and risk management skills to lead the Group.

The Board considers that objectivity and integrity are prerequisites for all appointments, as are the skills, experience, ability and diversity that will assist the Board in its key functions and decision-making. The Board sees the role of the Non-Executive Directors to be to independently and constructively challenge the performance of the Executive Management and to offer assistance and mentor where their skills and experience can assist the performance of the Management team in the delivery of agreed objectives.

The Board of Directors currently comprises four Directors; the Non-Executive Chairman, the Managing Director, the Finance Director, and one Non-Executive Director. The Board's one independent Non-Executive Director is Joe Darby, who is also Senior Independent Director. A brief description of each of the Directors' backgrounds and experience can be found on page 31. The Board continues to review its composition.

Terms and conditions of appointment of Non-Executive Directors are set out in appointment letters.

How the Board operates

A detailed schedule of matters reserved for the Board has been established and is periodically reviewed. The key matters reserved are the consideration and approval of:

- the Group's overall strategy and objectives;
- material acquisitions and disposals and major expenditure commitments;
- borrowing and hedging of oil and gas sales;
- the issuance of equity and options;
- annual work programme and budget;
- the Group's annual and, if prepared, half-yearly Financial Statements;
- Board appointments, remuneration and roles;
- corporate policies and corporate governance arrangements; and
- any transactions with related parties such as Major Shareholders.

Through the publication of regular announcements, and face-to-face meetings where appropriate, the Board has sought to communicate its strategy, objectives and performance to all shareholders on a timely basis.

The Board of Directors expects to hold face to face Board Meetings approximately six times per year. In addition, further meetings are convened by conference call to resolve urgent business matters.

Committees of the Board

The Company has established two sub-committees of the Board, an Audit Committee, and a Remuneration Committee; the purpose of which are to review areas of the business mandated by the Board and to present findings and recommendations to the Board for its decision. While the Board delegates certain of its duties, responsibilities and powers to the Committees, so that these can receive suitably focused attention, they both act on behalf of the full Board, and the matters reviewed and managed by the Committees remain the responsibility of the Board of Directors as a whole.

Each of the Committees has its own written terms of reference; copies of which are available on the Company's website.

1. Audit Committee

The Audit Committee is chaired by Joe Darby and its activities are governed by terms of reference that are available on the Company's website. The primary duties of the Audit Committee are:

- to review and consider the integrity of the Company's Financial Statements and regulatory announcements;
- to keep under review the effectiveness of the Company's internal controls;
- to assist the Board in ensuring that it receives appropriate financial and risk reporting to enable it to make its business decisions;
- to regularly review the Company's risk management processes and the risks to which the Company is exposed;
- to oversee the relationship with the external auditor;
- to review the Company's whistle-blowing processes; and
- to report to the Board on how the Audit Committee has discharged its responsibilities.

Number of meetings 2022

Attendance:

	Board	Audit	Remuneration
Andrew Morris	10	2	n/a
Joe Darby	10	2	3
John Bell	10	2	n/a
Michael Kroupeev	9	1	3

In addition to the formal Committees of the Board, the Company has established two additional Committees to help with the Governance of the Group:

Strategic Advisory Board

Given the complex nature of managing the Group's Syrian assets and the goal of an ultimate return to production when circumstances allow, the Company has sought significant political, legal and strategic advice. While some of this support has come from lawyers and advisers, the Company has found great value in creating a Board of advisors made up of individuals with deep experience in the fields of diplomacy, international politics, and post conflict rehabilitation.

2. Remuneration Committee

The Remuneration Committee is chaired by Joe Darby and its activities are governed by terms of reference that are available on the Company's website. It is responsible for considering and making recommendations to the Board in respect of remuneration for the Chairman and Executive Directors. The Committee also has oversight of the remuneration arrangements for the direct reports to the Executive Directors, the remuneration for whom is set by the Managing Director in conjunction with the Chairman. The remuneration of Non-Executive Directors is a matter for the Chairman in consultation with the Managing Director and the Chairman of the Remuneration Committee, with fees being determined by the Board excluding the Non-Executive Directors.

The number of meetings of the Board and its Committees during 2022, and individual attendance by Directors, is shown below:

	Board	Audit	Remuneration
Number of meetings 2022	10	2	3
Attendance:			
Andrew Morris	10	2	n/a
Joe Darby	10	2	3
John Bell	10	2	n/a
Michael Kroupeev	9	1	3

Sustainability Committee

As explained on pages 11 to 15 in the Strategic Report, Gulfsands is focused on building a sustainable business model that considers the social, environmental and governance impacts of all its projects. This is guided throughout by the principles outlined by the UN Global Compact and the UN's Sustainable Development Goals ("SDG's"). Gulfsands' progress and performance on its strategic approach to Sustainability is overseen and driven by the Sustainability Committee, chaired by the Managing Director and comprises a combination of line managers and members of the Board and Strategic Advisory Board.

All other Director held share options at 31 December 2021 or 2022.

This Report was approved by the Board of Directors on 25 May 2023.

Independent Auditor's Report

to the members of Gulfsands Petroleum plc

Opinion

We have audited the financial statements of Gulfsands Petroleum plc (the 'Parent Company') and its subsidiaries (the 'Group') for the year ended 31 December 2022 which comprise:

- the Consolidated Income Statement
- the Consolidated Balance Sheet
- the Consolidated Statement of Changes in Equity
- the Consolidated Cash Flow Statement
- the related Group Notes 1 to 6.7 including accounting policies
- the Company Balance Sheet
- the Company Statement of Changes in Equity
- the Company Cash Flow Statement
- the related Parent Company Notes 1 to 6.8 including accounting policies.

The financial reporting framework that has been applied in their preparation is applicable law and UK adopted International Financial Reporting Standards ("UK adopted IFRS") and, as applied in accordance with the provisions of the Companies Act 2006.

In our opinion:

- give a true and fair view of the state of the Group's and of the Parent Company's affairs as at 31 December 2022 and of the Group's loss for the year then ended;
- have been properly prepared in accordance with UK adopted International Financial Reporting Standards (IFRSs); and
- have been prepared in accordance with the requirements of the Companies Act 2006

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Group and the Parent Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the United Kingdom, including the Financial Reporting Council's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty relating to going concern

We draw your attention to Note 1.3a of the financial statements on page 45 of the financial statements, which indicate the Group may need to raise additional finance from its shareholders to fund future obligations and there is no guarantee that the required funding will be available. As noted in Note 1.3a this indicates that a material uncertainty exists that may cast significant doubt on the Group and Parent Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

Emphasis of matter – carrying value of Group's Syrian Assets

We draw attention to note 4.2 of the Consolidated Financial Statements concerning the valuation of the Group's suspended producing operations in Syria, which is recorded at \$102 million following the loss of joint control in December 2011. There is significant uncertainty as to the duration of the UK Sanctions imposed in December 2011 and the eventual outcome of events in Syria. The potential impact any outcome will have on the carrying value from the producing asset is unknown. Our opinion is not modified in respect of this matter.

Other information

The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic Report and the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the Strategic Report and the Directors' Report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of our knowledge and understanding of the Group and Parent Company and their environment obtained in the course of the audit, we have not identified material misstatements in the Strategic Report and the Directors' Report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of directors

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal controls as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or Parent Company or to cease operations, or have no realistic alternative but to do so.

Auditor responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below:

- Enquiry of management to identify any instances of non-compliance with laws and regulations.
- Enquiry of management around actual and potential litigation and claims.
- Enquiry of management to identify any instances of known or suspected instances of fraud.

- Discussing among the engagement team regarding how and where fraud might occur in the financial statements and any potential indicators of fraud.
- Reviewing minutes of meetings of those charged with governance.

Because of the inherent limitations of an audit, we are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our Auditor's Report.

Use of our report

This report is made solely to the Parent Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Parent Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Parent Company and the Parent Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Financial Statements

Notes to the Consolidated Financial Statements

for the year ended 31 December 2022

Section 1 – Basis of Preparation

1.1 Authorisation of Financial Statements and statement of compliance with IFRS

Gulfsands Petroleum plc is a public limited company which was quoted on the Alternative Investment Market of the London Stock Exchange (“AIM”) until 23 April 2018 and is incorporated in the United Kingdom. The principal activities of the Company and its subsidiaries (the “Group”) are that of oil and gas production, exploration and development.

The Consolidated Financial Statements for the year ended 31 December 2022 were authorised for issue by the Board of Directors on 25 May 2023 and the Balance Sheets were signed on the Board’s behalf by Andrew James Morris, Finance Director.

The Consolidated Financial Statements have been prepared in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006. The principal accounting policies adopted are set out in note 1.3.

1.2 Adoption of International Financial Reporting Standards

The Consolidated Financial Statements for the year ended 31 December 2022 and for the comparative year ended 31 December 2021 have been prepared in accordance with UK adopted International Financial Reporting Standards (“UK adopted IFRS”) in accordance with the provisions of the Companies Act 2006.

1.3 Significant accounting policies

a) Basis of preparation, measurement and accounting standards

The Consolidated Financial Statements have been prepared in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006. The consolidated financial statements have been prepared on a historical cost basis. The preparation of financial statements in compliance with adopted IFRS requires the use of certain critical accounting estimates. It also requires Group management to exercise judgment in applying the Group’s accounting policies. The areas where significant judgments and estimates have been made in preparing the financial statements and their effect are disclosed in note 1.4.

Going concern

As at the date of this Report, the Group has free cash available for operations totalling approximately \$1.2 million (of which \$0.64 million is awaiting electronic transfer settlement) and ongoing general and administrative costs are expected to be approximately \$0.2 million per month. One further tranche of between £750,000 and £1 million is available under the 2017 Facility to be drawn down on or after 30 June 2023. The precise amount of this drawdown is at the discretion of the Board but after consultation with the Lenders based on the prevailing activity of the business at the time. These funds are expected to fund the Company’s general and administrative costs through 2023.

Additional funding will be required by early 2024. The 2017 Facility is due to mature on 31 December 2023 and the Board is in ongoing discussions with the Lenders (who are also the Major Shareholders) regarding what happens at maturity, when both the Company and the Lenders will have the right to convert the outstanding amount thereunder into equity at 5 pence per share. These discussions also cover how the Company and Group will be funded going forward, whether it be by an extension of the 2017 Facility or some other structure.

The Directors note that the Company remains reliant on the support of its two Major Shareholders, and the Board maintains a good relationship with these Major Shareholders who continue to support the Company’s strategy as outlined in this Report. Without this support, the Company would be seriously financially challenged.

As a result of its ongoing dialogue with the Major Shareholders regarding the Group’s future business strategy and financing, the Board has confirmed the Major Shareholders’ intention to continue to support the Group going forward. However, there are no signed funding commitments in place, as at the date of this report, beyond those in the 2017 Facility. Despite the confidence that future financing will be available from the Major Shareholders, the Company also continues to explore alternative sources of financing, in particular to finance the Group’s business development ambitions.

Following completion of a review of the going concern position of the Company and Group at the meeting of the Board of Directors on 25 May 2023, including consideration of the uncertainties described above, the Board has concluded that it is confident that, with free cash available for operations totalling \$1.2 million (of which \$0.64 million is awaiting electronic transfer settlement), the remaining funds available to be drawn down under the 2017 Facility, plus any additional financing that will need to be secured beyond the current expiry of the 2017 Facility, the Company and the Group is likely to have sufficient resources to continue in operational existence for the foreseeable future, being a period not less than twelve months from the date of approval of this Financial Report. Accordingly, the Directors consider it appropriate to continue to adopt the going concern basis in preparing these Financial Statements.

Notwithstanding the confidence that the Board has in its ability to finance the Group’s business, the Directors, in accordance with Financial Reporting Council guidance in this area, conclude that at this time there is material uncertainty that finance could be procured to fund ongoing costs and liabilities, and failure to do so might cast significant doubt upon the Company’s and the Group’s ability to continue as a going concern and that the Company and the Group may therefore be unable to realise their assets and discharge their liabilities in the normal course of business. These Financial Statements do not include the adjustments that would result if the Group was unable to continue as a going concern.

Financial Statements

Notes to the Consolidated Financial Statements (continued)

for the year ended 31 December 2022

1.3 Significant accounting policies (continued)

b) Accounting standards, amendments and interpretations effective in 2022

Other Accounting standards that have come into effect as of 1 January 2022 have been:

- Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16, subsequent to the second part of a two-phase project under Interest Rate Benchmark Reform "IBOR", which finalises the IBOR and other interest rate benchmarks reform.

The adoption of these standards has had no effect on the financial results of the Group.

c) Standards, amendments and interpretations, which are effective for reporting periods beginning after the date of these financial statements which have not been adopted early:

There are a number of standards, amendments to standards, and interpretations which have been issued that are effective in future periods and which the Group has chosen not to adopt early, in particular:

- Onerous Contracts – Cost of Fulfilling a Contract (Amendments to IAS 37);
- Property, Plant and Equipment: Proceeds before Intended Use (Amendments to IAS 16);
- Annual Improvements to IFRS Standards 2018-2020 (Amendments to IFRS 9);
- Reference to the Conceptual Framework – Amendments (IFRS 3);
- Definition of accounting estimate – Amendments (IAS 8); and
- Deferred tax on leases and decommissioning obligations – Amendments (IAS 12).

None of these are expected to have a significant effect on the Group.

d) Basis of consolidation

Intra-group sales, profits and balances are eliminated fully on consolidation.

The results of subsidiaries acquired or sold are consolidated for the periods from, or to, the date when control passed. Acquisitions are accounted for under the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition date fair values of assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interest issued by the Group in exchange for the control of the acquiree. Acquisition related costs are recognised in the Income Statement as incurred. At the acquisition date the identifiable assets acquired, and the liabilities assumed are recognised at their fair value.

The Consolidated Financial Statements include the accounts of subsidiary undertakings when the Company has the control over the undertaking. The Company controls an investee if all three of the following elements are present: power over the investee; exposure to variable returns from the investee; and the ability of the investor to use its power to affect those variable returns. Control is reassessed whenever facts and circumstances indicate that there may be a change in any of these elements of control.

The Group is engaged in oil and gas exploration, development and production through joint operations. A joint operation is whereby the parties that have joint control of the arrangement have rights to the assets and obligations for the liabilities, relating to the arrangement. A joint operator recognises its assets, including its share of any assets incurred jointly; its liabilities, including its share of any liabilities incurred jointly; its revenues, including its share of revenue from the sale of the output by the joint operation; and its expenses, including its share of any expenses jointly incurred.

When the Group loses control or joint control of a subsidiary or joint operation, the profit or loss on disposal is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), less liabilities of the subsidiary or joint operation and any non-controlling interests. Amounts previously recognised in other comprehensive income in relation to the subsidiary or joint operation are accounted for in the same manner as would be required if the relevant assets or liabilities are disposed of. The fair value of any investment retained in the former subsidiary or joint operation at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under IFRS 9 'Financial Instruments: Recognition and Measurement' or, when applicable, the costs on initial recognition of an investment in an associate or jointly controlled entity.

e) Foreign and reporting currency

These Consolidated Financial Statements are presented in US Dollars. The functional and presentational currency of the Company is the US Dollar, and the functional currency of all subsidiaries is also the US Dollar. Gains and losses from foreign currency transactions, if any, are recognised in the Income Statement for the year. The effective exchange rate to the Pound Sterling for the year ended 31 December 2022 was £1: \$1.25 (2021: £1: \$1.37). The exchange rate to the Pound Sterling as at 31 December 2022 was £1: \$1.21 (2021: £1: \$1.35).

Foreign currency transactions of individual companies within the Group are translated to the functional and reporting currency of US Dollars at the rates prevailing when the transactions occurred. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange at the Balance Sheet date. All differences are taken to the Income Statement.

1.4 Critical accounting judgements and key sources of estimation uncertainty

In the application of the Group's accounting policies, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of revision and future periods if the revision affects both current and future periods.

The following sets out the critical judgements and estimations that the Directors have made in the process of applying the Group's accounting policies and the key assumptions concerning the future and other key sources of estimation uncertainty at the Balance Sheet date that have a significant risk of causing a material adjustment to the carrying values of assets and liabilities within the next financial year:

- going concern (judgement) – for further details see note 1.3a;
- recoverability of restricted cash balances (judgement) – for further details see note 3.3;
- 2017 Facility equity conversion option (estimation) – for further details see notes 3.6 and 6.2; and
- carrying value of the Group's Syrian Assets (i.e. investment in DPC (estimation) – for further details see note 4.2.

Financial Statements

Notes to the Consolidated Financial Statements (continued)

for the year ended 31 December 2022

Section 2 – Oil and Gas Assets

2.1 Property, plant and equipment

The Group applies the requirements of IFRS 6 'Exploration for and Evaluation of Mineral Resources' and where additional guidance is needed IAS 16 'Property, Plant and Equipment' and IAS 36 'Impairment of Assets' noting that several items in the latter two standards are exempted for assets at the exploration and evaluation stage due to the application of IFRS 6. Set out below is our interpretation of the principles set out in IFRS 6 and other IFRS.

Recognition and measurement

Development and production assets are accumulated on a cash generating unit basis and represent the cost of developing the Proved plus Probable Reserves discovered and bringing them into production, together with the exploration and evaluation ("E&E") asset expenditures incurred in finding Proved plus Probable Reserves, transferred from intangible E&E assets.

The cost of development and production assets also includes the cost of acquisitions and purchases of such assets, directly attributable overheads.

Depletion of producing assets

Expenditure within each cash generating unit is depleted by a unit of production method using the ratio of oil and gas production in the year compared to the estimated quantity of Proved and Probable Reserves at the beginning of the year. Costs used in the unit of production calculation comprise the net book value of capitalised costs plus the estimated future field development costs for Proved and Probable Reserves. Changes in estimates of commercial reserves or future development costs are dealt with prospectively.

Impairment

An impairment test is performed whenever events and circumstances arising during the development or production phase indicate that the carrying value of a development or production asset may exceed its recoverable amount. The aggregate carrying value is compared against the recoverable amount of the cash generating unit, generally by reference to the present value of the future net cash flows expected to be derived from production of commercial reserves.

The Company currently has no tangible Oil and Gas Assets, following the reclassification of its Syrian assets to Investments (see note 4.2).

2.2 Property, plant and equipment other than oil and gas assets

Property, plant and equipment other than oil and gas assets, which comprise predominantly computer hardware and software, are stated at cost less accumulated depreciation and any provision for impairment. Depreciation is charged so as to write-off the cost, less estimated residual value, of assets on a straight-line basis over their useful lives of between two and five years.

	Property Plant & Equipment Total \$'000
Cost:	
At 1 January 2021	1,514
Additions	–
Disposals	–
At 31 December 2021	1,514

Net book value at 31 December 2022	–

2.3 Intangible assets

Key accounting judgements, estimates and assumptions

Recoverability of intangible oil and gas exploration and evaluation assets

If there are indicators of impairment, the carrying values of E&E assets are assessed for impairment which involves judgement as to the (i) likely commerciality of the assets, (ii) future revenues and costs pertaining and (iii) the discount rate to be applied for the purpose of deriving a recoverable value. Additional judgements apply to the Group's E&E assets affected by sanctions in Syria. See note 4.2 for further details.

The Group applies the requirements of IFRS 6 'Exploration for and Evaluation of Mineral Resources', set out below is our interpretation of the principles set out in IFRS 6.

Recognition and measurement

The Group follows the successful efforts method of accounting whereby costs for unsuccessful exploration activities are expensed. All licence acquisition, exploration and evaluation costs are initially capitalised as intangible fixed assets in cost centres by licence or contract, as appropriate, pending determination of commerciality of the relevant property. Directly attributable administration costs are capitalised insofar as they relate to specific exploration activities. Pre-licence costs and general exploration costs not directly attributable to any particular licence or prospect are expensed as incurred.

E&E assets relating to each exploration licence/prospect are not amortised but are carried forward until the existence or otherwise of commercial reserves has been determined. If commercial reserves have been discovered, the related E&E assets are assessed for impairment on a cash generating unit basis as set out below and any impairment loss is recognised in the Income Statement. The carrying value of the E&E assets, after any impairment loss, is then reclassified as development and production assets in property, plant and equipment. Costs of unsuccessful exploration efforts are expensed at the time that a determination is made that the exploration has failed to locate commercially recoverable hydrocarbons.

Impairment

As the Group does not hold any intangibles with an indefinite useful life, non-current assets are assessed for impairment on a cash generating unit basis when facts and circumstances suggest that the carrying amount may exceed its recoverable amount. Such triggering events in respect of E&E assets include: the point at which final determination is made as to whether commercial reserves exist; actual or imminent expiry of exploration licence/contract without expectation of renewal; and/or no further plans to explore the licence/contract area.

Where there has been an indication of a possible impairment, Management assesses the recoverability of the carrying value of the cash generating unit by comparison with the estimated discounted future net cash flows based on Management's expectation of the future production, hydrocarbon prices and costs. Any identified impairment is charged to the Income Statement.

Where conditions giving rise to impairment subsequently reverse, the effect of the impairment charge is also reversed as a credit to the Income Statement, net of any amortisation that would have been charged since the impairment.

	Syria \$'000	Colombia \$'000	Total \$'000
Cost:

Financial Statements

Notes to the Consolidated Financial Statements (continued)

for the year ended 31 December 2022

2.3 Intangible assets (continued)

Syria

The accumulated costs of E&E assets in Syria represent the Group's share of the drilling costs of the Al Khairat, Twaiba and Wardieh wells and certain 3D seismic surveys. The Al Khairat well was successfully tested although commercial development approval is yet to be granted by the government of the Syrian Arab Republic since force majeure was declared prior to application for a Production Licence. An application has been prepared and will be submitted as soon as circumstances allow, and Contingent Resources have been allocated to this discovery. The Twaiba and Wardieh wells are still under evaluation. Following the imposition of UK Sanctions against the oil industry in Syria, an impairment test was conducted and the carrying value of all E&E assets in Syria was impaired to nil as a result of the uncertainty arising at that time. The E&E assets remain impaired as at the date of this Report.

Colombia

During the year the Group had an interest in one E&P contract in Colombia, Llanos-50 ("LLA-50"). In March 2022, the Group received confirmation from the ANH that the Llanos-50 licence was officially terminated by mutual consent without liability to either party. In 2022, the intangible exploration and evaluation ("E&E") asset of \$2.29 million (cost and cost impaired) representing capitalised expenditures from inception to-date, were disposed of. Alongside this, £1.22 million (~\$1.52 million) of restricted cash was released back to the Company by the ANH in May 2022.

2.4 Work obligation commitments

As at 31 December 2022 the Group had no capital commitments. There were no other material obligations or contracts outstanding in relation to ongoing projects not provided for or disclosed in these Consolidated Financial Statements.

Financial Statements

Notes to the Consolidated Financial Statements (continued)

for the year ended 31 December 2022

Section 3 – Working Capital

3.1 Trade and other receivables

Trade receivables are carried at original invoice amounts less any provision made for impairment of receivables. A provision for impairment of trade receivables is made when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the debt.

	2022 \$'000	2021 \$'000
Other receivables	52	21
Prepayments and accrued income	144	191
	196	212

At 31 December 2022 and 2021 the Group was owed \$25.3 million by the government of the Syrian Arab Republic relating to oil delivered during the period of August to November 2011. The total amount invoiced was \$31.2 million and to November 2011 an amount of \$5.9 million had been paid. This asset was fully provided against in 2011 due to the uncertainties of recovery. The recovery of this amount is included within the impairment calculations modelled when reviewing the Syrian investment for any impairment, see note 4.2 for further details.

3.2 Cash and cash equivalents

Cash and cash equivalents comprise cash in hand and deposits repayable on demand by banks and other short-term investments with original maturities of three months or less. Balances held in bank accounts subject to escrow agreements as collateral for performance bonds issued are excluded from cash and cash equivalents and are shown as long-term financial assets.

	2022 \$'000	2021 \$'000
Cash at bank and in hand	1,108	884
Restricted cash balances	500	500
Total cash and bank resources	1,608	1,383
Included in long-term financial assets (note 3.3)	(500)	(500)
Total cash and cash equivalents	1,108	884

3.3 Long-term financial assets

Long-term financial assets comprise balances held in bank accounts subject to escrow agreements as collateral for performance bonds issued.

Key accounting judgements, estimates and assumptions:

Restricted cash balances at 31 December 2021 included \$1.78 million of deposits collateralising guarantees given to ANH, the state regulator, to secure minimum exploration work commitments in Colombia under the Llanos-50 licence ("LLA-50"). These were fully provided against but following the mutual termination of the Llanos-50 licence in May 2022, £1.22 million (~\$1.52 million) of this restricted cash was released back to the Company by the ANH. As at 31 December 2022 there is no balance relating to Llanos-50.

	2022 \$'000	2021 \$'000
Restricted cash balances	500	2,281
Provision against recovery of restricted cash balances	—	(1,781)
Total cash and cash equivalents	500	500

The amount of \$0.5 million (31 December 2021: \$0.5 million) relates the Group's Syrian Block 26 interest. If returned, half of this amount would be due to Gulfsands joint venture partner, Sinochem Group, and so a payable of \$0.25 million has been included for this in non-current liabilities (note 3.4).

3.4 Trade and other payables

Trade payables are not interest-bearing and are stated at their nominal values.

	2022 \$'000	2021 \$'000
Current liabilities		
Trade payables	43	56
Accruals and other payables	497	311
	540	367
Non-current liabilities		
Trade payables, accruals and other payables	3,810	3,972
	3,810	3,972

Non-current liabilities include predominantly legacy items relating to the Syria business prior to the declaration of force majeure in 2011 due to UK Sanctions. This includes certain amounts that were in dispute at the time and certain amounts relating to parties subject to asset freezing regulations under the UK Sanctions regime. It is unclear if and when these amounts may become payable. These amounts will be re-assessed when the situation in Syria normalises.

3.5 Inventory

Inventories comprise materials and equipment, which are stated at the lower of cost and net realisable value. Cost includes all costs incurred in bringing the materials and equipment to its present condition and location.

	2022 \$'000	2021 \$'000
Drilling and production inventory	750	750
Provisions	(750)	(750)
	—	—

Drilling and production inventory of \$0.75 million (2021: \$0.75 million) relates to Syrian operations. In 2020, the Company concluded that due to the security situation in Syria, significant amounts of inventory had either been stolen or were otherwise no longer under the control of the Group. Management therefore wrote down the gross value of inventory to \$0.75 million but maintained a provision of \$0.75 million (2021: \$0.75 million) against its value, given the uncertainties that remain around access to the inventory and ability to use it in the near term as a result of current UK Sanctions. This treatment remains as at 31 December 2022.

Financial Statements

Notes to the Consolidated Financial Statements (continued)

for the year ended 31 December 2022

3.6 Loans and borrowings

Group and Company

Recognition and measurement

Equity and debt instruments are classified as either equity or as financial liabilities in accordance with the substance of the contractual arrangement.

Secured Term Financing Facility

On 15 February 2017, the Company closed a Secured Term Financing Facility of up to £4 million (~\$5 million) (the "2017 Facility") with its Major Shareholders, Waterford, Blake and ME Investments Limited.

The 2017 Facility had a maturity of February 2020 and was available for drawdown by the Company in five equal tranches of £0.8 million (~\$1 million). The first three tranches were drawn down in 2017 and the remaining two tranches in early 2018.

In March 2018 an extension to the 2017 Facility was agreed with the Major Shareholders, giving a further £4 million (~\$5 million) of committed funding in four new tranches. As part of this amendment consummated in March 2018, the maturity date of the 2017 Facility was extended by one year to February 2021, at which date all outstanding amounts would be repayable in cash unless the Company has exercised an equity conversion right. Under this equity conversion right, the 2017 Facility (as amended) was extinguishable with equity at maturity, at the Company's option, into shares of the Company at a price equal to the lower of (i) 5.09 pence (being the 90-day average closing price prior to 19 March 2018 - the date immediately prior to the announcement of the delisting proposal) and (ii) the lowest price at which the Company has raised equity capital during the life of the 2017 Facility (the "Extinguishment Option").

Two of the new tranches were drawn down in 2018. In 2019, the remaining two tranches were drawn down as scheduled.

In November 2019, the Company's Major Shareholders committed a further £4.1 million (~\$5.13 million) of funding for the Group. £1.1 million (~\$1.4 million) of the funding was provided through an underwritten equity offering (which completed in December 2019), and a further £3 million (~\$3.75 million) of funding was added to the 2017 Facility to be available for draw-down in three instalments of £1 million (~\$1.3 million) on each of 30 June 2020, 31 December 2020 and 30 June 2021. As part of this agreement, the Lenders also agreed to convert £1 million (~\$1.3 million) of principal of the 2017 Facility to coincide with the equity offering.

In return for the Major Shareholders' funding commitments in November 2019, the Major Shareholders requested that the terms of the 2017 Facility be amended such that the pathway to conversion to Ordinary Shares be clarified and formalised. The Company and Major Shareholders agreed that this clarity was best achieved by amending the existing Offset Right which the Lenders had to participate in any subsequent Equity raise at an effective discount of 10%. This Offset Right was therefore amended to become a formal conversion option for the Lenders at a price of 5 pence per Ordinary Share (the "Lenders' Conversion Option"). Consequently, the 2017 Facility was amended, not only to incorporate the new tranches and an extension of its maturity date to 31 December 2021, but also to remove the Offset Right, incorporate the Lenders Conversion Option and eliminate interest and other fees going forward. The Group retained the Extinguishment Option at maturity, which ratcheted down to 5 pence per share following the December 2019 equity offering.

Until the November 2019 amendment, interest on loans made (together with accrued fees and interest) ran at 7% per annum and a commitment fee of 1% per annum ran on any undrawn proportion of the Facility, with all fees and interest accruing quarterly. These were eliminated on a go-forward basis from November 2019.

The amendment to the conversion feature in November 2019 necessitated a change in accounting treatment under IFRS 9.

The Directors concluded that as a package, the changes made to the 2017 Facility were both in the best interests of the Company and were a fair package. The changes represented a significant modification under IFRS 9. However, the fair value of the loan, under the new terms were determined to be equivalent to the carrying value. Hence, no gain or loss was recognised by the amendment.

During 2021, the eleventh tranche of £1 million (~\$1.3 million) and the twelfth tranche of £1 million (~\$1.3 million) were drawn down.

In December 2021, the remaining Major Shareholders (Blake and Waterford) committed additional funding of up to £6.5 million (~\$8.8 million) through an expansion and extension of 2017 Facility, to cover expected General and Administrative costs for the next two years and some potential business development activity. The 2017 Facility was also extended for two years to now mature on 31 December 2023 and the strike price of the Extinguishment Option was fixed at 5 pence per share. The funding of up to £4 million of committed funding for general and administrative costs was made available for draw-down in four instalments on each of 31 December 2021, 30 June 2022, 31 December 2022, and 30 June 2023. Each instalment was to be between £0.75 million and £1 million depending on business requirements. The business development activity funding of up to £2.5 million of funding will be assessed, as required, based on opportunities identified, though this is subject to the further consent of the Major Shareholders at the time.

These amendments in December 2021, again represented a significant modification under IFRS 9. As a result of this, the existing Equity reserve held for the 2017 Facility was released through retained Earnings and a new Equity portion established in accordance with IFRS 9. The difference between the fair value of the loan, measured as the present value of the expected cash flows at maturity discounted at an assumed market rate of interest of 12% per annum, and the existing carrying value of the Facility at the date of the amendments was recognised directly in equity and hence no gain or loss was recognised by the amendment.

The 2017 Facility conversion options, described above as the Extinguishment Option and the Lenders' Conversion Option, are embedded derivatives that are separately measured at fair value through profit or loss. The Company considers that the conversion options, which are respectively a financial asset and a financial liability, meet the conditions in IAS 32 that require their offsetting and presentation on a net basis because it is envisioned that they will both be settled in a single transaction. The net value of the options is immaterial and has not been presented separately in the consolidated balance sheet.

During 2022, the thirteenth tranche of £0.5 million* (~\$0.6 million) was drawn in March 2022, and the fourteenth tranche of £0.75 million (~\$0.9 million) was drawn down in November 2022 (*1. A drawdown request for £0.75 million was made under the terms of the 2017 Facility in March 2022, of which £0.5 million was received in March 2022. The remaining £0.25 million was waived in May 2022, following the receipt of the restricted cash funds from Colombia).

All, or part, of the undrawn portion of the 2017 Facility may be cancelled at any time by the Company. The Company may prepay the whole or any part (if at least £0.8 million) of the outstanding amounts at any time subject to paying a 10% premium on the amount pre-paid. The proceeds are being used for general and administrative expenses of the Group and for working capital purposes. The entire 2017 Facility (as amended) is secured: by a mortgage over the shares of the Company's direct subsidiary, Gulfsands Petroleum Limited; by a charge over certain intercompany receivables of the Company; by a charge over certain bank accounts of the Company (should the Lenders require such a charge to be created); and through the issue of one ordinary share in the share capital of Gulfsands Petroleum Limited to the security trustee. The security trustee for the Facility is Fides Trust Limited. The articles of association of Gulfsands Petroleum Limited were also amended to include certain reserved matters requiring unanimous shareholder consent, pre-emption provisions and compulsory transfer provisions. In addition to the right to enforce the security, on an insolvency-related event of default, the Lenders have the right to convert outstanding amounts under the Facility into a direct equity holding in Gulfsands Petroleum Limited, at a fair price (from a financial point of view taking into account all relevant circumstances) to be determined by an expert at the time.

As at 31 December 2022, the Group had \$14.9 million (£12.3 million) (2021: \$15.0 million [£11.1 million]) of debt outstanding including accrued interest and fees under the 2017 Facility. Under applicable accounting standards (IFRS 9) this debt is represented in the balance sheet as \$13.3 million debt liability and \$3.3 million equity, totalling \$16.6 million, to reflect the split between the discounted value of the debt and the resulting equity value as at the time of the extension in December 2021, and at each drawdown date. Although there is no interest payable under the new terms of the 2017 Facility, a non-cash effective interest rate of 12% is accrued on the discounted debt liability over the life of the facility, to reflect the Directors' view of the arm's length cost of funding of the business. The 2017 Facility now matures on 31 December 2023.

The movement on the loan balance in the year is represented as follows:

	2022 \$'000	2021 \$'000
At 1 January	11,982	11,118
Loan draw-downs	1,566	2,769
Interest expense	1,409	1,437
Foreign exchange (gain)/loss	(1,340)	(202)
Conversion into equity	—	—
Transfer to capital contribution reserve (note 6.2)	(257)	(146)
Equity element of Facility resulting from December 2021 Amendment	—	(2,994)
At 31 December	13,360	11,982

Financial Statements

Notes to the Consolidated Financial Statements (continued)

for the year ended 31 December 2022

Subsequent to the year-end, in April 2023, a drawdown request for £0.75 million was made under the terms of the 2017 Facility.

Therefore, as at the date of this Annual Report, one remaining tranche remains available for drawdown of between £750,000 and £1 million which is expected to be drawn down in H2 2023 and fund the company to the end of 2023.

The potential business development finding tranche of up to £2.5 million also remains outstanding but is subject to further consent by the major Shareholders.

The maturity of the 2017 Facility is 31 December 2023. The 2017 Facility is convertible at a fixed price of 5 pence per share at the option of either the Lenders (at any time), or, assuming no default exists, the Company (at maturity).

Section 4 – Other Assets and Liabilities

4.1 Investments

The Company's investments in subsidiary undertakings are shown below. All investments are in ordinary shares and are directly or indirectly owned by the Company as stated below:

Name of company	Proportion of voting shares at 31 December 2022	Nature of business	Country of incorporation
Directly held by the Company:			
Gulfsands Petroleum Ltd. ^(b)	99.99% ^(a)	Holding company	Cayman Islands
Indirectly held by the Company:			
Gulfsands Petroleum Holdings Ltd ^(b)	100%	Holding company	Cayman Islands
Gulfsands Middle East Limited ^(c)	100%	Management services	Abu Dhabi
Gulfsands Petroleum Levant Ltd ^(b)	100%	Oil and gas exploration	Cayman Islands
Gulfsands Petroleum Iraq Ltd ^(b)	100%	Oil and gas exploration	Cayman Islands
Gulfsands Petroleum (MENA) Ltd ^(b)	n/a	Oil and gas exploration	Cayman Islands

(a) One share of Gulfsands Petroleum Limited is owned by the Security Trustee under the 2017 Facility security provisions.

(b) Company registered address: 30 The Strand, 46 Canal Point Drive, Grand Cayman KY1-1105, Cayman Islands.

(c) During 2022, Gulfsands acquired Hussain Global Consultants Limited, a dormant Abu Dhabi entity, which entity was renamed Gulfsands Middle East Limited. The Company's registered address is: 24th Floor, 2461 Al Sila Tower, ADGM Square, Al Maryah Island, Abu Dhabi, UA.

4.2 Financial asset held at fair value through other comprehensive income

Key accounting judgements, estimates and assumptions

Fair value of the Group's investment in Dija Petroleum Company ("DPC")

The Group's investment in DPC, the entity established in Syria, pursuant to the Block 26 PSC, to administer the Group's Syrian oil and gas development and production assets (and which for this purpose is considered to also include the related rights to production under the PSC), is recorded as a "Financial asset held at fair value through other comprehensive income" investment.

Due to the unknown duration of UK Sanctions in force against Syria and uncertainty over the eventual outcome of events in the country, any valuation attributed to the investment is highly subjective and there are a wide range of possible fair value measurements. Management have reviewed their internal valuation methodology in 2022 (as well as prior years) and continues to believe that as a result of the further passage of time, the significant future uncertainty, and the high degree of judgement required, it is not possible to reliably estimate the investment's fair value. As part of Management's internal valuation exercise they have identified a range of valuations for the investment. Management have completed an assessment against the criteria outlined in IFRS9 and have concluded that for the aforementioned reasons the historical cost of \$102 million represents the most appropriate fair value, with it being the last valuation which could be reliably determined. The investment cost of \$102 million is within the wide range of potential outcomes calculated as part of the internal valuation method. Management, continues to consider that the historical cost figure of \$102 million, represents an appropriate estimate of fair value, given there is a wide range of possible fair value measurements, being the last valuation which could be reliably determined, as previously disclosed. This value will be reviewed periodically for impairment and any impairment losses recognised through the Income Statement.

Financial assets held at fair value through other comprehensive income should be stated at fair value. Gains and losses arising from changes in fair value are recognised in other comprehensive income and accumulated in the investments revaluation reserve.

Impairment review of the Group's investment in DPC

As part of an internal review process, management assess the recoverability of the carrying value of the Financial asset held at fair value through other comprehensive income investment by comparison with the estimated discounted future net cash flows based on Management's expectation of the future production, hydrocarbon prices, estimated time to resumption of production and costs.

The Group is party to a PSC for the exploitation of hydrocarbon production in Block 26 in Syria. Pursuant to the PSC the Group operates its Syrian oil and gas production assets through a joint venture administered by DPC in which the Group has a 25% equity interest. The Group lost joint control of DPC on 1 December 2011 following the publication of European Union Council Decision 2011/782/CFSP. For the purposes of UK Sanctions, DPC is considered to be controlled by General Petroleum Corporation ("GPC"). Since the Group has neither joint control nor significant influence over the financial and operating policy decisions of the entity, it carries its investment in DPC and the associated rights under the Block 26 PSC as a Financial asset held at fair value through other comprehensive income. The carrying value of the Financial asset held at fair value through other comprehensive income investment at 31 December 2022 is \$102 million (2021: \$102 million).

In order to carry out an impairment review, Management use an economic model of the estimated future cash flows that could be generated in respect of the Group's entitlement volumes in Block 26. The Management team have reviewed this in detail and believe due to the high degree of subjectivity inherent in the valuation it is imperative that the valuation model and its key drivers and assumptions are as transparent as possible. Management assessed the key drivers to be:

- the oil price; and
- the delay to resumption of production.

1. Oil price

For the year ended 31 December 2022 Management have used ERC Equipose Ltd's (Independent Energy Experts) Q1 2023 "base oil price deck" for the period from 2023 (\$85 /bbl) to 2032 (\$90 /bbl), and then a 2% per annum escalation factor applied thereafter as the forecast for the 'base case' comparative valuation for the impairment review. Given the other sources of oil price data reviewed, Management considers this to be an appropriate approach. However, sensitivities are provided below showing the impact that a 25% and 50% rise and fall in oil price would have on the impairment calculation.

2. Delay to resumption of production

Gulfsands cannot give a definite timeline for the resumption of the full field development of the discovered fields within Block 26 that was suspended under the declaration of Force Majeure in 2011. Whilst no definite timeline can be substantiated, the Board continues to believe that the UK Sanctions will be lifted within the next five years and will continue to monitor all activity focused on resolving the situation in Syria. Based on the current situation in Syria, and acknowledging the inherent uncertainty in any assumption regarding a return date, the Board has concluded, as it did last year, that an appropriate estimate for the resumption of operations is three years. Therefore, the Board has decided to use commencement of production in three years as the estimate 'base case' comparative valuation for the impairment review.

Other model assumptions

The model uses the production profiles based upon 2C contingent resources at Khurbet East (Massive, Butmah and Kurrachine Dolomite), Yousefieh (Massive) and Al Khairat (Massive). As part of the CPR and FDP work undertaken by OPC, production profiles were reanalysed and reconfirmed. The model has been amended accordingly. Receivables are included in relation to oil produced and invoiced but not yet received, and oil produced and not yet invoiced, on the expectation that these amounts will be recovered once UK Sanctions are lifted. The table is based on using a 15% discount rate to give a net present value ("NPV").

The economic model calculates:

- a Gross Contractor undiscounted NPV(0) of \$2.74 billion;
- Gulfsands 50% interest, undiscounted NPV(0) of \$1.37 billion; and
- Gulfsands 50% interest discounted NPV(10) of \$491.5 million
- Gulfsands 50% interest discounted NPV(15) of \$334.0 million

Financial Statements

Notes to the Consolidated Financial Statements (continued)

for the year ended 31 December 2022

The Group has used the NPV(15) of \$334.0 million (2021: \$301.0 million) to conclude that no impairment is necessary but the following table sets out the NPV(15) calculated when adjusting the two key drivers: oil price and time delay to resumption of production. All figures are presented in \$ million:

Oil price	Delay to first production		
	One year delay	Three year delay	Five year delay
50% decrease	234.5	142.0	77.5
25% decrease	381.0	238.5	139.5
ERCE's Q1 2023 base oil price deck	528.0	334.0	200.5
25% increase	674.5	429.5	261.0
50% increase	821.5	525.0	321.5

The following table sets out the impact that changes in the key variables would have on the comparative valuation of the asset, \$334 million, for the impairment review.

	Change in comparative valuation of investment from \$334 million (\$ million)
Delay until first production	
5 years	(133.5)
1 year	194.0
Oil price	
50% decrease	(192.0)
25% decrease	(95.5)
25% increase	95.5
50% increase	191.0
Change in discount rate to	
20%	(95.0)
10%	157.5
Change in forecast capex	
25% increase	(12.5)
25% decrease	12.5
Change in forecast opex	
25% increase	(6.0)
25% decrease	6.5

The Directors have reviewed the carrying value of this Financial asset held at fair value through other comprehensive income at 31 December 2022 and are of the opinion that no impairment is required to the carrying value. Although the carrying value is subject to significant uncertainty, Management believes it remains appropriate in the circumstances, although not necessarily reflective of the value of the Group's investments in its Syrian operations over the long term once re-entry into Syria is completed. Management reiterate that there is a high degree of subjectivity inherent in the valuation calculated for impairment purposes, due to the unknown duration of the sanctions and the eventual outcome of events in Syria. Accordingly, it may change materially in future periods depending on a wide range of factors and an impairment may then be required.

In a separate exercise, as part of the 2019 CPR and subsequently updated each year since, OPC undertook an economic evaluation of the Company's entire Block 26 assets including both Contingent and Prospective Resources. None of these evaluations have taken into account any of the above-ground risks associated with the assets, but they did consider a range of possible valuation scenarios and indicated a central range of risked Expected Monetary Value ("EMV") of the Block 26 assets, including both Contingent and Prospective Resources, of \$1 billion - \$1.5 billion (net share to Gulfsands).

Section 5 – Results for the Year

5.1 Segmental analysis of continuing operations

For management purposes, during 2021 and 2022 the Group operated in two geographical areas: Suspended operations in Syria (as discussed in note 4.2) and Colombia (which ceased in late 2022). All segments are involved with the production of and exploration for, oil and gas. The "Other" segment represents corporate and head office costs.

The Group's results and certain asset and liability information for the year are analysed by reportable segment as follows:

Year ended 31 December 2022

	Syria \$'000	Colombia \$'000	Other \$'000	Total \$'000
Total administrative expenditure	(768)	(298)	(1,680)	(2,746)
Exploration costs written off/impaired	—	—	—	—
Recovery of restricted cash balances	—	1,520	—	1,520
Operating (loss)/profit	(768)	1,222	(1,680)	(1,226)
Financing cost	—	—	—	(270)
Net loss from continuing operations	—	—	—	(1,496)
Total assets	102,576	—	1,228	103,804
Total liabilities	(4,090)	—	(13,620)	(17,710)
E&E capital expenditure	—	—	—	—

Year ended 31 December 2021

	Syria \$'000	Colombia \$'000	Other \$'000	Total \$'000
Total administrative expenditure	(629)	(209)	(2,028)	(2,867)
Exploration costs written off/impaired	—	—	—	—
Operating loss	(629)	(209)	(2,028)	(2,867)
Financing cost	—	—	—	(1,324)
Net loss from continuing operations	—	—	—	(4,191)
Total assets	102,680	15	901	103,596
Total liabilities	(4,172)	—	(12,149)	(16,321)
E&E capital expenditure	—	—	—	—

5.2 Operating loss

The Group's operating loss for continuing operations is stated after charging:

	2022 \$'000	2021 \$'000
Share-based payment charges (note 5.3)	57	1
Depreciation and amortisation of other assets (notes 2.2 and 2.3)	—	—
Exploration expenditure written-off/impaired (note 2.3)	—	—
Staff costs excluding share-based payments (note 5.5)	1,752	1,763
Lease rentals:		
Buildings	44	20

Financial Statements

Notes to the Consolidated Financial Statements (continued)

for the year ended 31 December 2022

Leases

Rentals payable under leases are charged to the Income Statement on a straight-line basis over the lease term.

5.3 Share-based payments

The Company has made equity-settled share-based payments to certain employees and/or Directors by way of issues of share options. The fair value of these payments is calculated at grant date by the Company using the Black-Scholes option pricing model excluding the effect of non-market-based vesting conditions. The expense is recognised on a straight-line basis over the period from the date of award to the date of vesting, based on the Company's best estimate of the number of options that will eventually vest. At each Balance Sheet date, the Company revises its estimates of the number of options expected to vest as a result of the effect of non-market-based vesting conditions. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to retained profit.

The only share-based plan currently in operation is the Gulfsands Restricted Share Plan which was introduced in 2010 and was due to expire in 2020 but has been extended to 2030. Under this plan, share awards may be granted to Directors and members of staff and may be based upon length of service and/or linked to achievement of performance criteria. All instruments outstanding and issued during the year under this plan are share options to purchase Ordinary Shares in the Company.

Share options are issued with an exercise price equivalent to the underlying share price averaged over a period immediately prior to the date of grant, or such other exercise price as the Remuneration Committee may determine. Share options will usually have a deferred vesting period and a maximum validity period of ten years. The share-based payment charge for the period is based upon the requirements of IFRS 2 'Share-based Payment'. For this purpose, the estimated fair value of the share options granted was calculated using a Black-Scholes option pricing model. No dividends were factored into the model and volatility was estimated based on a combination of historic and anticipated price performance. The estimated fair value of share options with a deferred vesting period is charged to the Income Statement over the vesting period of the options concerned. The estimated fair value of options exercisable immediately is expensed at the time of issuance of the award. The charge for the year was \$57,000 (2021: \$1,000) and further details are provided in note 6.1.

During 2016, John Bell was appointed full time Managing Director and Andrew Morris was appointed Finance Director on a less than full time basis. In view of the continuing uncertainty surrounding the Company's business in Syria and the shortage of available funds, it was decided that remuneration packages for these two executives should be a combination of base salary and share options. Accordingly, John Bell was awarded 8 million share options and Andrew Morris 5 million share options. 4 million of Mr Bell's options and 3 million of Mr Morris' were set to vest quarterly over a two-year period from July 2016 dependent in part on continued service during that period and in part on performance criteria related to the achievement of strategic objectives. All these options have now vested.

The vesting schedule of the additional 4 million and 2 million options respectively was not set at the time of issuance but during 2018, the Board confirmed the vesting criteria would be based upon operational targets. In addition, contractual terms were clarified which resulted in Mr. Morris being issued an additional 1 million such options. Once vested, the options are exercisable for a period of 10 years (from 2016). In 2018, half of these remaining, unvested 2016 options vested on the completion of the Putumayo-14 farmout (2 million and 1.5 million options respectively). In May 2022, following confirmation of the mutual termination of the Llanos-50 licence, the remaining half of these options (2 million and 1.5 million options respectively) vested.

Share options were also granted to the Chairman and two new Non-Executive Directors in 2016. These options were not subject to performance criteria. Half of their respective awards vested on the date of award in 2016 and the other half vested after one year in mid-2017.

During 2017, 1,900,000 stock options were issued to key members of Staff, which options were not subject to performance criteria and vested after one year.

During 2018, in addition to the clarifications on the 2016 stock options issued to Mr. Bell and Mr. Morris as described above, the Board issued additional options to Mr Bell and Mr Morris to vest based upon strategic goals in relation to Syria. Mr Bell was issued 8 million such options and Mr. Morris was issued 4 million such options ("2018 Executive Options"). These 2018 Executive Options are set to accumulate to the holders over a period of 3 years (in 6 equal tranches, each 6 months starting on 1 July 2018) but will only vest upon the achievement of key strategic milestones in respect of Syria. Once vested the 2018 Executive Options are exercisable for a period of 10 years (from July 2018) and have a strike price of 5 pence.

During 2020, all remaining 2018 Executive Options accumulated, but remain unvested. Also, during the year, following negotiations with the Company, Mr Bell and Mr. Morris agreed to surrender 1,200,000 each of their 2018 Executive Options. Therefore, as of 1 January 2021, the number of outstanding 2018 Executive Options is 9,600,000, which have accumulated, but none have vested (Mr. Bell 6,800,000, Mr. Morris 2,800,000). These options have been charged to the profit and loss account based upon their accumulation schedule.

Also, during 2020, a tax advantaged Company Share Option Scheme (CSOP) was introduced for Staff and Executive Directors. During the year 4,400,000 CSOP options (Executive Directors: 2,400,000, Staff: 2,000,000) were issued with a strike price of 5 pence per share. The CSOP options issued to Staff are not subject to performance criteria and vest after three years. The CSOP options issued to Executive Directors will vest upon the earlier of the achievement of key strategic milestones in respect of Syria and a period of three years. These remain unvested. Once vested, the CSOP options are exercisable for a period of 10 years (from grant date in 2020).

As a result of the Mandatory Offer in May 2021, Mr Bell exercised 6 million 2016 options and Mr Morris exercised 4.5 million 2016 options into the Mandatory Offer. All other options were rolled forward to continue to exist under their original terms and the Gulfsands Restricted Share Plan. As a result of the Mandatory Offer the CSOP options continue to exist but have lost their tax advantaged status.

During 2021, 2,000,000 stock options were issued to members of Gulfsands Strategic Advisory Board which options are scheduled to vest in four tranches between December 2021 and June 2023 (1,500,000 options have vested as at 31 December 2022). These options have a maturity of 10 years from issuance and a strike price of 5 pence per share.

During 2022, 1,050,000 stock options were issued to John Bell and Andrew Morris, which options are not subject to performance criteria and vested immediately. These options have a maturity of 10 years from issuance and a strike price of 1 pence per share.

Fair value of share options granted

The fair value of options granted under the share options scheme is estimated as at the date of grant using a variant of the Black Scholes model, taking into account the terms and conditions upon which the options are granted, which includes the performance conditions. The following table lists the inputs to the model used for the options granted in the year ended 31 December 2022.

Year Issued:	2022	2021
Dividend yield	n/a	n/a
Expected share price volatility	50.0%	50.0%
Risk free interest rate	3.0%	2.0%
Exercise price	5 pence	5 pence
Expected / maximum life of option (years)	10	10

5.4 Auditor's remuneration

Details of the auditor's remuneration is set out in the table below:

	2022 \$'000	2021 \$'000
Fees payable to the Company's principal auditor for the audit of:		
Company's accounts	85	68
Company's subsidiaries	—	—
Total audit fees	85	68
Audit related assurance services	—	—
Total non-audit fees	—	—
Fees payable to other auditors for the audit of:		
Company's subsidiaries	5	20
Total audit fees	5	20
Taxation compliance services	8	8
Other taxation advisory services	—	—
Total non-audit fees	8	8

Financial Statements

Notes to the Consolidated Financial Statements (continued)

for the year ended 31 December 2022

5.5 Staff costs

The aggregate payroll costs of staff and Directors were as follows:

	2022 \$'000	2021 \$'000
Wages and salaries	1,569	1,530
Pension costs	8	11
Social security costs	150	194
Share-based payment charges	57	1
Other benefits in kind	25	28
	1,809	1,764

The average monthly number of persons employed by the Group, including Directors was as follows:

	2022	2021
Operational and technical	1	2
Administrative	7	9
	8	11

5.6 Directors' emoluments

Details of the remuneration of Directors are included in the Directors' Corporate Governance Report on page 36.

5.7 Taxation

Current tax

Current tax, including UK Corporation Tax and overseas tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the Balance Sheet date.

Where current or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

	2022 \$'000	2021 \$'000
Current Corporation Tax:		
UK Corporation Tax	—	—
Overseas Corporation Tax	—	—
Total credit	—	—

The Group's effective tax rate differs from the theoretical amount that would arise using the UK domestic corporation tax rate applicable to profits of the consolidated companies as follows:

	2022 \$'000	2021 \$'000
Total loss before tax from continuing operations	(1,496)	(4,191)
Tax calculated at domestic rate of 19% (2021: 19%)	(284)	(796)
Effects of:		
Expenses not deductible for tax purposes	(26)	42
PSC expenses not subject to corporation tax ⁽¹⁾	28	135
Tax losses utilised	87	(167)
Tax losses for which no deferred tax asset was recognised	133	781
Impact of local tax rates	62	5
	—	—

(1) The Group's tax liabilities in Syria are settled on its behalf by the national oil companies out of the latter's share of royalties and profit oil and, as such, are not reflected in the Group's tax charge for the year.

Deferred tax

Deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted, or substantively enacted, tax rates and laws that will be in effect when the differences are expected to reverse. The recoverability of deferred tax assets is evaluated annually, and an impairment provision is made if it is more likely than not that the deferred tax asset will not give rise to future benefits in the Group's tax returns. Deferred tax assets are not provided where the Group does not consider it probable that sufficient future taxable profits will be made to offset the deductions represented by those deferred tax assets. In performing this calculation, the Group considers deferred tax balances relating to each tax authority separately. No deferred tax assets have been provided in respect of losses carried forward and other temporary timing differences as the Board does not consider it probable that sufficient future taxable profits will be made to offset the deductions represented by those deferred tax assets.

The tax effect of amounts for which no deferred tax asset has been recognised is as follows:

	2022 \$'000	2021 \$'000
DD&A and impairment in excess of tax allowances	190	144
Other short-term temporary differences	—	—
Tax losses carried forward	11,088	10,449
Unrecognised deferred tax asset	(11,278)	(10,593)
Deferred tax asset/(liability) at 31 December	—	—

The main corporation tax rate in the UK increased from 19% to 25% on 1 April 2023, which has already impacted the rate at which deferred tax is recognised due to this being substantively enacted as at 31 December 2022.

\$0.3 million of the Group's unutilised tax losses expire within one to five years of the Balance Sheet date.

5.8 Loss per share

The basic and diluted loss per share has been calculated using the loss for the year ended 31 December 2022 of \$1.49 million (2021: \$4.19 million) for both continuing operations and for the loss attributable to the owners of the parent company.

The basic loss per share was calculated using a weighted average number of ordinary shares in issue 572,495,785 (2021: 567,749,210). The weighted average number of ordinary shares, allowing for the exercise of share options and new ordinary shares subject of potential future conversion pursuant to the terms of the Lender's Conversion Option and Company's Extinguishment Option, for the purposes of calculating the diluted loss per share was 818,614,156 (2021: 812,399,086), however, where there is a loss, the impact of share options is not dilutive and hence, basic and diluted loss per share are the same.

Financial Statements

Notes to the Consolidated Financial Statements (continued)

for the year ended 31 December 2022

Section 6 – Capital Structure and Other Disclosures

Equity instruments

Group and Company

Equity instruments issued by the Company, being any instruments with a residual interest in the assets of the Company after deducting all its liabilities, are recorded at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Share premium account

The share premium account represents the amounts received by the Company on the issue of its shares which were in excess of the nominal value of the shares.

Retained earnings

Cumulative net gains and losses recognised in the Statement of Comprehensive Income less any amounts reflected directly in other reserves. The share option reserve has been included within the retained deficit and is a non-distributable reserve.

6.1 Share capital

Group and Company

	2022 \$'000	2021 \$'000
Allotted, called up and fully paid:		
572,495,785 Ordinary Shares of 1 pence (2021: 561,995,785 Ordinary Shares of 1 pence)	19,491	19,491

On 17 September 2015, each of the Company's existing ordinary shares were subdivided into one ordinary share of 1 pence and one deferred share of 4.7142865 pence. Consequently, other than the ordinary share referenced in the above table, there are in issue 121,989,500 deferred shares. The rights of both the ordinary and the deferred shares are as set out in the Articles of Association as amended 15 September 2015. Deferred shares in issue do not have voting rights and are not entitled to dividends.

The movements in share capital and share options were:

	Number of ordinary shares	Number of deferred shares	Number of 2010 Restricted Share Plan options	Weighted average price of options (£)
At 31 December 2021	572,495,785	121,989,500	25,400,000	0.04
Share options granted	—	—	1,050,000	0.05
Share options lapsing unexercised	—	—	(600,000)	0.05
At 31 December 2022	572,495,785	121,989,500	25,850,000	0.0407

The detail of the share options outstanding at 31 December 2022 are as follows:

Maturity date	Year share options vest	Exercise price of options (£ pence)	Number of share options
11 November 2026	See Note 5.3	1.00	3,500,000
11 November 2026	2016 - 2018	3.375	4,000,000
5 July 2028	2018	4.25	1,900,000
28 June 2028	See Note 5.3	5.00	9,600,000
30 June 2030	See Note 5.3	5.00	3,800,000
7 December 2031	See Note 5.3	5.00	2,000,000
31 December 2032	See Note 5.3	1.00	1,050,000
		4.07	25,850,000

Of the share options outstanding, 4,550,000 options have an exercise price of 1 pence per share, 4,000,000 options have an exercise price of 3.375 pence per share, 1,900,000 have an exercise price of 4.25 pence and 15,400,000 have an exercise price of 5.00 pence. The weighted average exercise price of stock options is 4.07 pence.

The highest share price during the year was £0.045 and the lowest price was £0.045 (2021: £0.045 and £0.045).

As a result of the amendment to the 2017 Facility in November 2019, the Outstanding amount under the 2017 Facility became convertible into Ordinary Shares at a price of 5 pence per share. As at 31 December 2022, the Outstanding amount under the 2017 Facility was £12,305,918.46 (\$16.6 million) which would be convertible into 246,118,371 Ordinary Shares.

6.2 Capital contribution reserve

Group and Company

	2022 \$'000	2021 \$'000
As at 1 January	2,994	2,367
Equity element of convertible loan note (see note 3.6)	257	146
Recycling of capital contribution reserve through retained earnings	—	(2,513)
Extension of secured loan from 31.12.2021 to 31.12.2023	—	2,994
At 31 December	3,251	2,994

As described in note 3.6 the capital contribution reserve was first established as a result of the 2019 amendment to the 2017 Facility when it became zero-coupon and convertible. It now reflects the discounted value of the note as a result of the December 2021 amendment, and at each drawdown. All subsequent drawdowns are also split between a Debt and an Equity element in accordance with IFRS 9. The value of the debt is reflected in note 3.6.

6.3 Financial instruments, derivatives and capital management

Risk assessment

The Group's oil and gas activities are subject to a range of financial risks, as described below, which can significantly impact its performance.

Liquidity risk

At the end of the year the Group had cash and cash equivalents of \$1.11 million, and further bank balances of \$0.5 million held in escrow to guarantee minimum work obligations. Cash forecasts identifying the liquidity requirements of the Group are produced frequently. These are reviewed regularly by management and the Board.

The following table details the Group's remaining contractual maturity for its non-derivative financial assets and liabilities with agreed repayment periods. The table has been drawn up based on the undiscounted cash flows of the financial assets and liabilities based upon the earliest date on which the Group can be required to pay or receipt. The table includes both interest and gross undiscounted cash flows.

	Less than three months \$'000	Three months to one year \$'000	One to three years \$'000	More than three years \$'000	Total \$'000
31 December 2022					
Current trade and other payables	(540)	—	—	—	(540)
Non-current trade and other payables	—	—	—	(3,810)	(3,810)
Loan facility	—	(13,360)	—	—	(13,360)
	(540)	(13,360)	—	(3,810)	(17,710)

31 December 2021

Current trade and other payables	(367)	—	—	—	(367)
Non-current trade and other payables	—	—	—	(3,972)	(3,972)
Loan facility	—	—	(11,982)	—	(11,982)
	(367)	—	(11,982)	(3,972)	(16,321)

During 2022, the loan facility had a weighted average effective interest rate of 0% (2021: 0%). Although there is no interest payable under the new terms of the 2017 Facility, the non-cash effective interest rate of 12% is accrued on the discounted debt liability over the life of the facility, to reflect the Directors' view of the arm's length cost of funding of the business. No other balances in the table above are interest bearing.

Financial Statements

Notes to the Consolidated Financial Statements (continued)

for the year ended 31 December 2022

Currency risk

The Group has currency exposure arising from transactions denominated in currencies other than the functional currency of the Company and all its subsidiaries, US Dollars. These transactions relate to certain costs of its oil and gas exploration and production operations which are denominated in local currencies or in Euro, and its head office costs, which are denominated in Pounds Sterling.

Given the 2017 Facility is convertible into equity by the Lenders or the Company, and that the Company's equity and 2017 Facility are denominated in Pounds Sterling, foreign currency exposure of the 2017 Facility is not included in the Group's net assets and loss before tax sensitivity tables below.

In Syria where operations are covered by PSCs, costs incurred in currencies other than US Dollars are recoverable under the terms of the PSC at the rate of exchange between US Dollars and that currency at the date of payment of the expense.

The Group maintains part of its cash balances in Pounds Sterling to defray head office costs but limits exposure to other currencies as far as practicable. The following table demonstrates the sensitivity to changes in the US Dollar exchange rate, with all other variables held constant, on the Group's net assets:

	Change in US Dollar rate	Effect on net assets \$'000
2022	(+ or -) 5%	+/- 58
2021	(+ or -) 5%	+/- 44

Credit risk

The following table demonstrates the sensitivity to changes in the US Dollar exchange rate, with all other variables held constant, on the Group's (loss) before tax:

	Change in US Dollar rate	Effect on loss before tax \$'000
2022	(+ or -) 5%	+/- 88
2021	(+ or -) 5%	+/- 101

Credit risk refers to the risk that a counter-party will default on its contractual obligations resulting in a financial loss to the Group. The Group's operations are typically structured via contractual joint venture arrangements. As such, the Group is reliant on joint venture partners to fund their capital or other funding obligations in relation to assets and operations which are not yet cash generative. The Group closely monitors the risks and maintains a close dialogue with those counterparties considered to be highest risk in this regard.

In addition, the Company is reliant for funding upon the availability of up to £4.5 million (£3.5 million as at 25 May 2023) under the 2017 Facility, from its Major Shareholders (of which £2.5 million is subject to further Major Shareholder consent). The Board remains in regular dialogue with Major Shareholders to ensure the Group retains their ongoing support.

To measure expected credit losses on a collective basis, trade receivables and contract assets are grouped based on similar credit risk and aging. The contract assets have similar risk characteristics to the trade receivables for similar types of contracts. The Directors do not consider that any further provision is necessary against any financial assets.

Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and, to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may return capital to shareholders, issue new shares or sell assets to reduce debt.

The capital structure of the Group consists of net debt (borrowings as disclosed in note 3.6 after deducting cash and cash equivalents and restricted cash balances as disclosed in note 3.2) and equity of the Group (comprising issued capital, reserves and retained earnings).

Financial assets

The Group's financial assets consist of long-term financial assets, its Financial asset held at fair value through other comprehensive income investment in DPC, cash at bank and receivables. The interest rate profile at 31 December for these assets at US Dollar equivalents was as follows:

	Financial assets on which interest is earned \$'000	Financial assets on which no interest is earned \$'000	Total \$'000
2022			
US Dollar	5	102,512	102,517
Pound Sterling	—	985	985
Euro	—	179	179
Other currencies	—	123	123
	5	103,799	103,804
2021			
US Dollar	5	102,517	102,522
Pound Sterling	—	753	753
Euro	—	303	303
Other currencies	—	18	18
	5	103,591	103,596

The Pound Sterling, Euro and Syrian Pound assets principally comprise cash in hand, cash in instant access accounts and short-term money market deposits. The US Dollar assets represent a Financial asset held at fair value through other comprehensive income financial asset, cash on call accounts, money market accounts, and short-term receivables.

In the current economic climate with exceptionally low interest rates, the Group is not sensitive to fluctuations in the interest rate received on bank and money market deposits and accordingly no sensitivity analysis is published.

Included in financial assets on which no interest is earned at 31 December 2022 and 2021 was a gross amount of \$25.3 million of trade receivables that has been fully provided against. This amount is due from the government of the Syrian Arab Republic in respect of oil sales in Syria. Due to the ongoing sanctions against the country's oil industry the payment of this amount has been delayed and, taking into account the current exceptional circumstances in Syria and the consequential difficulty of predicting the timing of future payment, has been fully impaired. The recovery of this amount is included within the impairment calculations modelled when reviewing the Syrian investment for any impairment, see note 4.2 for further details.

The remaining trade receivables consist of amounts receivable from various counterparties where the Group considers the credit risk to be low. This risk is monitored by the Group.

Financial liabilities

The Group's financial liabilities consist of both short-term and long-term payables in addition to the 2017 Facility. None of the short and long-term payables bear interest to external parties. The 2017 Facility interest was 7% per annum until 29 November 2019 when it was reduced to 0%. Note that as at 31 December 2022, the Group had \$16.6 million (2021: \$15.0 million) actual debt outstanding under the 2017 Facility, which, in accordance with accounting standards, is presented in the balance sheet as \$16.6 million being \$13.3 million as a debt liability (shown in the table above) and \$3.3 million through equity.

The Group's short-term liabilities are considered to be payable on demand. Despite the 2017 Facility bearing no interest, under IFRS 9, interest is imputed at 12%, which is reflected in the tables below. At 31 December financial liabilities are classified as shown below:

	Financial liabilities on which interest is charged \$'000	Financial liabilities on which no interest is charged \$'000	Total \$'000
2022			
US Dollar	—	4,090	4,090
Pound Sterling	13,360	260	13,620
Other currencies	—	—	—
	13,360	4,350	17,710
2021			
US Dollar	—	3,589	3,589
Pound Sterling	11,982	186	12,168
Other currencies	—	22	22
	11,982	3,797	15,779

Financial Statements

Notes to the Consolidated Financial Statements (continued)

for the year ended 31 December 2022

6.3 Financial instruments, derivatives and capital management (continued)

Commodity price risk

The realisation of the carrying values of oil and gas assets within these Consolidated Financial Statements, and the value of the Group's Financial asset held at fair value through other comprehensive income financial assets, being the Syrian interests, are in part dependent upon future oil and gas prices achieved. Note 4.2 gives details of the impact of a change in the oil price on the valuation of Financial asset held at fair value through other comprehensive income financial assets. In 2022 and 2021 the Group did not enter into any derivative contracts.

Fair values

The Group's investment in DPC, the entity established in Syria, pursuant to the PSC, to administer the Group's Syrian oil and gas development and production assets (and for these purposes which is considered to also include the related rights to production under the PSC), is recorded as an Financial asset held at fair value through other comprehensive income investment. Due to the unknown duration of UK Sanctions in force against Syria and uncertainty over the eventual outcome of events in the country, any valuation attributed to the investment is highly subjective and subject to material change and uncertainty. Management believes that as a result of the further passage of time and the high degree of judgement required, it is not possible to reliably estimate the investment's fair value. Management will therefore carry forward the last valuation which could be reliably determined, being the \$102 million previously disclosed. This value will be reviewed periodically as described further in note 4.2. At 31 December 2022 and 2021, the Directors considered the fair values and book values of the Group's financial assets and liabilities to be level 3 valuations.

6.4 Related party transactions and key management

Key management of the Group are considered to be the Directors of the Company. Directors' interests in shares and their remuneration and share options are disclosed in the Directors' Corporate Governance Report on page 36. The remuneration of Directors for each of the categories specified in IAS 24 'Related Party Disclosures' is:

	2022 \$'000	2021 \$'000
Short-term employee benefits	681	797
Short-based payments charge	57	—
	738	797

The 2017 Facility is deemed a related party transaction as a result of the affiliation of Director' Mr. Kroupeev to the Major Shareholders.

All of the above related party transactions were made on terms equivalent to those that prevail in arm's length transactions. Balances and transactions between the Company and its subsidiaries, which are related, have been eliminated on consolidation and are not disclosed in this note. Transactions between the Group and its subsidiaries are disclosed in note 6.6 of the Company Financial Statements. There were no other related party transactions of the Group during the years ended 31 December 2022 or 2021.

6.5 Obligations under leases

At the end of the year the Group had commitments for future minimum lease payments under non-cancellable leases as follows:

	2022 Land and buildings \$'000	Other \$'000	2021 Land and buildings \$'000	Other \$'000
Amounts payable on leases:				
Within one year	114	—	12	—
In two to five years	11	—	—	—
	125	—	12	—

There are no future minimum sublease payments expected to be received under non cancellable subleases at the end of the reporting period (31 December 2021: \$nil).

6.6 Contingent liabilities

Claim by Al Mashrek Group in Syria

Al Mashrek Global Investment Ltd ("Al Mashrek") has filed a claim with the Courts in Damascus, Syria, against Gulfsands Petroleum Levant Limited (incorporated in Cayman Islands) ("GPLL") and the Syrian registered branch of GPLL on the grounds that Al Mashrek was not properly notified of the Group's Open Offer completed in January 2016 and hence lost the opportunity to subscribe for new shares in the Open Offer and as a result Al Mashrek's equity was subsequently diluted. The value of the claim is \$2 million, although no justification has yet been provided for this value.

In 2019 the Courts in Damascus, Syria accepted the request of Al Mashrek to amend the name of the defendant from GPLL and the Syrian registered branch of GPLL, to Gulfsands Petroleum Plc. Consequently, a submission was made to the Court challenging its jurisdiction over a claim against Gulfsands Petroleum Plc, and the branch of GPLL in Syria also submitted a request to the Court to officially remove GPLL from the claim. Neither of these requests have yet been granted.

In connection with the original claim, the Court of Appeal of Damascus issued an order of provisional attachment on Gulfsands' moveable and immovable assets in Syria, including GPLL's share of Block 26. The plaintiff has not been successful in putting this provisional attachment order into effect. The Group therefore believes that there are no assets to which Al Mashrek's claim is attached.

During 2022 there were further hearings in Court. The Court awaits a report from the Ministry of Petroleum and Mineral Resources, following which, the Court's expert will issue a report to the Court, and the Court will then issue a preliminary decision.

Gulfsands continues to obtain legal advice on this matter and is determined to protect its rights in Syria, to resist and ultimately dismiss this claim.

Management believe the outflow of funds in relation to this claim to be possible but not probable and therefore no provision has been made as at 31 December 2022.

6.7 Post balance sheet event

Colombia branch (Group and Company)

Following the mutual termination of the Llanos-50 licence in Colombia, the orderly administrative exit from Colombia was completed during 2022, with the in-country branch formally liquidated by way of a solvent liquidation. Official confirmation of this was received in early February 2023.

Financial Statements

Notes to the Parent Company Financial Statements

Section 1 – Basis of Preparation

1.1 Authorisation of Financial Statements and statement of compliance with IFRSs

Gulfsands Petroleum plc is a public limited company and incorporated in the United Kingdom. The principal activity of the Company is that of provision of services to its subsidiaries which are engaged in oil and gas production, exploration and development activities.

The Company Financial Statements for the year ended 31 December 2022 were authorised for issue by the Board of Directors on 25 May 2023 and the Balance Sheet was signed on the Board's behalf by Andrew James Morris, Finance Director.

The Company Financial Statements have been prepared in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006. The principal accounting policies adopted are set out in note 1.3.

1.2 Adoption of International Financial Reporting Standards

The Company's Financial Statements for the year ended 31 December 2022 and for the comparative year ended 31 December 2021 have been prepared in accordance with UK adopted International Financial Reporting Standards ("UK adopted IFRS") in accordance with the provisions of the Companies Act 2006.

See note 1.3b to the Consolidated Financial Statements for details of new IFRS and interpretations.

1.3 Significant accounting policies

a) Basis of preparation and accounting standards

The Company's significant accounting policies used in the preparation of the Company Financial Statements are set out in the notes below.

The Company Financial Statements have been prepared in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006 and, except for share-based payments, under the historical cost convention. They have also been prepared on the going concern basis of accounting, for the reasons set out in note 1.3a to the Consolidated Financial Statements.

b) Reporting currency

These Company Financial Statements are presented in US Dollars. The Company's operations are undertaken in Pounds Sterling, Euros and US Dollars. The majority of costs associated with foreign operations are paid in US Dollars and all loan balances with subsidiary undertakings are denominated in US Dollars. Therefore, the presentational and functional currency of the Company is the US Dollar. Gains and losses from foreign currency transactions, if any, are recognised in the Income Statement for the year. The effective exchange rate to the Pound Sterling for the year ended 31 December 2022 was £1: \$1.25 (2021: £1: \$1.37). The exchange rate to the Pound Sterling on 31 December 2022 was £1: \$1.21 (2021: £1: \$1.35).

1.4 Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described below, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of revision and future periods if the revision affects both current and future periods.

The Company's operations are undertaken in Pounds Sterling, Euros and US Dollars. The majority of costs associated with foreign operations are paid in US Dollars and all loan balances with subsidiary undertakings are denominated in US Dollars. The most appropriate presentational and functional currency is considered to be the US Dollar. Such judgement is reviewed periodically.

IFRS 9, requires the Company to make assumptions when implementing the forward-looking expected credit loss model. This model is required to be used to assess intercompany loan receivables from the Companies subsidiaries for impairment. Arriving at the expected credit loss allowance involved considering different scenarios for the recovery of the intercompany loan receivables, the possible credit losses that could arise and the probabilities for these scenarios. The following was considered; the exploration project risk, country risk, the expected future oil prices, the value of the potential reserves, the ability to sell the project, and the ability to find a new farm-out partner.

Section 2 – Property, Plant and Equipment and Intangible Assets

2.1 Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and any provision for impairment. Depreciation is charged so as to write-off the cost, less estimated residual value, of assets on a straight-line basis over their useful lives of between two and five years.

	Office equipment, fixtures and fittings \$'000
Cost:	
At 1 January 2021	61
At 1 January 2022	61
At 31 December 2022	61
Accumulated depreciation:	
At 1 January 2021	(61)
Charge for 2021	–
At 1 January 2022	(61)
Charge for 2022	–
At 31 December 2022	(61)
Net book value at 31 December 2022	–
Net book value at 31 December 2021	–

2.2 Intangible assets

Intangible assets are stated at cost less accumulated amortisation and any provision for impairment. Amortisation is charged so as to write-off the cost, less estimated residual value, of assets on a straight-line basis over their useful lives of between two and five years. Amortisation is included with depreciation and classified as administrative expenses. No intangible assets have indefinite lives.

Financial Statements

Notes to the Parent Company Financial Statements (continued)

Section 3 – Investments in Subsidiaries

3.1 Investments

The Company's investments in subsidiary companies are included in the Company Balance Sheet at cost, less provision for any impairment.

The Company's fixed asset investment of \$7.3 million represents the historic cost of acquisition of the entire share capital of Gulfsands Petroleum Ltd by means of a share-for-share exchange in 2005, less any required provision for impairment.

The Company's investments in subsidiary undertakings are shown in note 4.1 to the Consolidated Financial Statements.

Section 4 – Working Capital

4.1 Trade and other receivables

Trade receivables are carried at original invoice amounts less any provision made for impairment of receivables. A provision for impairment of trade receivables is made when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the debt.

	2022 \$'000	2021 \$'000
Current		
Other receivables	28	21
Prepayments and accrued income	139	161
	167	182
Non-current		
Amounts due from subsidiaries	54,461	53,547

Further details on the amounts due from subsidiaries are included in note 6.7.

4.2 Cash and cash equivalents

Cash and cash equivalents comprise cash in hand and deposits repayable on demand by banks and other short-term investments with original maturities of three months or less. Balances held in bank accounts subject to escrow agreements as collateral for performance bonds issued are excluded from cash and cash equivalents and are shown as long-term financial assets.

	2022 \$'000	2021 \$'000
Cash at bank and in hand	1,065	722
Total cash and cash equivalents	1,065	722

4.3 Long-term financial assets

Long-term financial assets comprise balances held in bank accounts subject to escrow agreements as collateral for performance bonds issued.

	2022 \$'000	2021 \$'000
Restricted cash balances	—	1,781
Provision against recovery of restricted cash balances	—	(1,781)
Total cash and cash equivalents	—	—

Following confirmation of the mutual termination of the Llanos-50 licence, £1.22 million (~\$1.52 million) of this restricted cash was released back to the Company by the ANH in May 2022.

4.4 Trade and other payables

Trade payables are not interest bearing and are stated at their nominal values.

	2022 \$'000	2021 \$'000
Current		
Trade payables	43	6
Accruals and other payables	218	185
	261	191

4.5 Loans and borrowings

See note 3.6 to the Consolidated Financial Statements.

Financial Statements

Notes to the Parent Company Financial Statements (continued)

Section 5 – Results for the Year

5.1 Revenue recognition

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective rate applicable.

Income Statement and total revenue

No individual Income Statement is presented in respect of the Company as permitted by section 408 of the Companies Act 2006. The Company's loss for the year was \$0.5 million (2021: \$3.6 million). There was no revenue during 2022, as defined by IFRS15 Revenue Recognition (2021: nil). The Company operates in one segment, that of the provision of services to Group undertakings, and in one geographical area, the United Kingdom.

5.2 Leases

Rentals payable under leases are charged to the Income Statement on a straight-line basis over the lease term.

Obligations under leases

At the end of the year the Company had commitments for future minimum lease payments under non-cancellable leases in respect of land and buildings of \$0.002 million (31 December 2021: \$0.002 million) within one year and \$nil (31 December 2021: \$nil) between two and five years.

5.3 Share-based payments

See note 5.3 to the Consolidated Financial Statements.

5.4 Taxation

Current tax

Current tax, including UK corporation tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax

No deferred tax assets have been provided in respect of losses carried forward in the UK and other temporary timing differences as the Board does not consider it probable that sufficient future taxable profits will be made to offset the deductions represented by those deferred tax assets.

Deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted, or substantively enacted, tax rates and laws that will be in effect when the differences are expected to reverse. The recoverability of deferred tax assets is evaluated annually and an impairment provision is provided if it is more likely than not that the deferred tax asset will not give rise to future benefits in the Company's tax returns.

Deferred tax assets/(liabilities)

	2022 \$'000	2021 \$'000
Tax losses carried forward	11,088	10,449
Depreciation in advance of capital allowances	190	144
Unprovided deferred tax asset	(11,278)	(10,593)
Deferred tax asset/(liability) at 31 December	—	—

The main corporation tax rate in the UK increased from 19% to 25% on 1 April 2023, which has already impacted the rate at which deferred tax is recognised due to this being substantively enacted as at 31 December 2022.

The tax losses of the Company have no expiry date.

5.5 Earnings per share

No earnings per share information is shown as the Company is not required to present an Income Statement.

Section 6 – Capital Structure and Other Disclosures

Equity instruments

Equity instruments issued by the Company, being any instruments with a residual interest in the assets of the Company after deducting all its liabilities, are recorded at the proceeds received, net of direct issue costs. Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Share premium account

The share premium account represents the amounts received by the Company on the issue of its shares which were in excess of the nominal value of the shares.

Retained earnings

Cumulative net gains and losses recognised in the Statement of Comprehensive Income less any amounts reflected directly in other reserves. The share option reserve has been included within the retained deficit and is a non-distributable reserve.

6.1 Share capital

See note 6.1 to the Consolidated Financial Statements

6.2 Capital contribution reserve

See note 6.2 to the Consolidated Financial Statements.

6.3 Financial instruments, derivatives and capital management

The financial risks of the Company are principally in respect of balances held in bank accounts and on deposit, and balances owed to, or owed by, subsidiary undertakings. Balances owed to, or owed by, subsidiary undertakings are all denominated in US Dollars. Other risks are managed on a unified basis with the Group and a full disclosure of these risks is made in note 6.3 to the Consolidated Financial Statements. The exposure of the Company to interest rate and currency movements is not significant. Given the 2017 Facility is convertible into equity by the Lenders or the Company, and that the Company's equity and 2017 Facility are denominated in Pounds Sterling, foreign currency exposure of the 2017 Facility is not included in this analysis.

A summary of the financial assets of the Company is set out below:

	Financial assets on which interest is earned \$'000	Financial assets on which no interest is earned \$'000	Total \$'000
2022			
US Dollar	17	54,461	54,478
Pound Sterling	901	167	1,068
Euro	147	—	147
Other currencies	—	—	—
	1,065	54,628	55,693
2021			
US Dollar	22	53,547	53,569
Pound Sterling	571	182	753
Euro	102	—	102
Other currencies	27	—	27
	722	53,729	54,451

Financial Statements

Notes to the Parent Company Financial Statements (continued)

Section 6 – Capital Structure and Other Disclosures (continued)

6.3 Financial instruments, derivatives and capital management (continued)

A summary of the financial liabilities of the Company is set out below:

	Financial liabilities on which interest is earned \$'000	Financial liabilities on which no interest is earned \$'000	Total \$'000
2022			
US Dollar	—	—	—
Pound Sterling	13,360	261	13,621
Other currencies	—	—	—
	13,360	261	13,621
2021			
US Dollar	—	—	—
Pound Sterling	11,982	191	12,173
Other currencies	—	—	—
	11,982	191	12,173

Despite the 2017 Facility bearing no interest, under IFRS 9, interest is imputed at 12%, which is reflected in the table above.

Note that as at 31 December 2022, the Group had \$14.9 million (£12.3 million) (2021: \$15.0 million [£11.1 million]) of debt outstanding including accrued interest and fees under the 2017 Facility. Under applicable accounting standards (IFRS 9) this debt is represented in the balance sheet as \$13.3 million debt liability and \$3.3 million equity, totalling \$16.6 million, to reflect the split between the discounted value of the debt and the value of the conversion option as a result of the extension in December 2021.

See financial liabilities, note 6.3 of the Consolidated Financial Statements, for further details.

6.4 Assets held by the Company

The Colombian Llanos 50 E&P contract was mutually terminated by the Company and the ANH in March 2022, following which, the Group and Company had no capital commitments in respect of that licence. In May 2022, £1.22 million (~\$1.52 million) of restricted cash was released back to the Company by the ANH. The deposits referenced in this note are shown as restricted cash amounts in note 4.3.

There were no other material obligations or contracts outstanding in relation to ongoing projects not provided for in these Financial Statements.

6.5 Foreign currency

Foreign currency transactions are translated to the functional and reporting currency of US Dollars at the rates prevailing when the transactions occurred. Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange at the Balance Sheet date. All differences are taken to the Income Statement.

6.6 Employees

The average monthly number of persons employed by the Company, including Executive Directors was three (2021: 5).

6.7 Related party transactions

(i) Transactions with Directors: Transactions with Directors are disclosed in note 6.4 to the Consolidated Financial Statements and in note 3.6 to the Consolidated Financial Statements. Interests in shares and their remuneration and share options are disclosed in the Directors' Corporate Governance Report on page 36.

(ii) Transactions with subsidiary Companies: The Company traded with various undertakings within the same Group during the years ended 31 December 2022 and 2021. IFRS 9 requires the Company to assess expected credit losses on intercompany loan receivables balances which are classified as held at amortised cost, under a forward-looking model approach. The intercompany loans are interest free and repayable on demand.

The Directors have assessed the cash flows associated with a number of different recovery scenarios, which includes consideration of the exploration project risk, country risk, the expected future oil prices, the value of the potential reserves, the ability to sell the project, and the ability to find a new farm-out partner. The credit loss allowance was assessed during 2022 and there was no increase/decrease in the expected credit loss allowance (2021: \$nil).

A summary of the transactions and outstanding balances at the year-end is set out below.

Balances owed by / (owed to) related parties

Name of related party	Nature of relationship	Commercial terms	2022 \$'000	2021 \$'000
Gulfsands Petroleum Ltd	Subsidiary	Non-interest bearing	54,261	53,547
Gulfsands Middle East Limited	Subsidiary	Non-interest bearing	200	—
Gulfsands Petroleum MENA Ltd	Subsidiary	Non-interest bearing	2,500	2,500
		Provision	(2,500)	(2,500)
Gulfsands Petroleum Iraq Ltd	Subsidiary	Non-interest bearing	5,943	5,943
		Provision	(5,943)	(5,943)
Total			54,461	53,547

Services recharged to related parties

Name of related party	2022		2021	
	Time writing \$'000	Indirect overhead \$'000	Time writing \$'000	Indirect overhead \$'000
Gulfsands Petroleum Levant Ltd	399	—	411	—
Gulfsands Middle East Limited	70	—	—	—

(iii) Controlling party: The parent company's immediate controlling party is Waterford, and the ultimate controlling party is Waterford.

6.8 Post balance sheet event

Post balance sheet events are disclosed in note 6.7 to the Consolidated Financial Statements.

P10 There exists a 10% probability that the true quantity or value is greater than or equal to the stated P10 quantity or value

P50 There exists a 50% probability that the true quantity or value is greater than or equal to the stated P50 quantity or value

P90 There exists a 90% probability that the true quantity or value is greater than or equal to the stated P90 quantity or value

Possible Reserves Possible Reserves are those additional reserves which analysis of geological and engineering data suggests are less likely to be recoverable than Probable Reserves. The total quantities ultimately recovered from the project have a low probability to exceed the sum of Proved plus Probable plus Possible ("3P") Reserves, which is equivalent to the high estimate scenario. In this context, when probabilistic methods are used, there should be more than a 10% probability that the quantities actually recovered will equal or exceed the 3P estimate.

Probable Reserves Probable Reserves are those unproved reserves which analysis of geological and engineering data suggests are more likely than not to be recoverable. In this context, when probabilistic methods are used, there should be more than a 50% probability that the quantities actually recovered will equal or exceed the sum of estimated Proved plus Probable Reserves.

Proved Reserves Proved Reserves are those quantities of petroleum which, by analysis of geological and engineering data, can be estimated with reasonable certainty (normally over 90% if measured on a probabilistic basis) to be commercially recoverable, from a given date forward, from known reservoirs and under defined economic conditions, operating methods, and government regulations.

Shareholder Information

Post delisting trading in Gulfsands Petroleum PLC shares

Gulfsands Petroleum Plc (“Gulfsands”) shares may be bought and sold through an electronic trading platform administered by **Asset Match**. www.assetmatch.com

Shareholders wishing to trade shares on Asset Match must do so through a UK stockbroker. Asset Match’s preferred broker is shareDeal active (www.sharedealactive.co.uk). However please contact Asset Match to confirm whether your existing broker is set-up to deal.

The Asset Match trading facility operates under its own code of practice which governs the behaviour of participants and the running of the periodic auctions. Asset Match operates an open auction system where volumes of bids and offers at different prices are displayed on its website together with the closing date of the auction. At the end of each auction period Asset Match pass this information through a non-discretionary algorithm that determines a “market-derived” share price based on supply and demand and allocates transactions accordingly. Bids and offers may be made and withdrawn at any time before the closing date of each auction.

Shareholders are encouraged to register at www.assetmatch.com and direct any enquiries by email to dealing@assetmatch.com or alternatively **Tel. 020 7248 2788**.

Asset Match is authorised and regulated by the Financial Conduct Authority.

If you have any queries regarding your shareholding or wish to advise any amendments, such as change of address, please contact our Registrars:
